GENERAL DETAILS

Introduction

A Census of Population was taken on the night of Sunday, 13 April 1986 in accordance with the Statistics (Census of Population) Order 1986 (S.I. No. 61 of 1986)¹. Copies of the Census questionnaire and of accompanying instructions are reproduced in Appendix 1, Volume 1 of the detailed Census report.

This third volume of the detailed report is in four parts. In the first three parts household composition is analysed in the context of (a) all private households; (b) private households in permanent housing units; and (c) private households in temporary housing units. The final part relates to family units and family cycle. Some basic classifications for these variables have been previously published in the series of Summary Population Reports. The territorial divisions of the country distinguished in this report are defined in Appendixes 2-4 of Volume 1.

Subsequent Census volumes will analyse the population by such factors as industry, occupation, education, Irish language, etc.

Coverage

The Census figures relate to the *de facto* population – i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 13 April 1986, together with all persons who arrived in that area on the morning of Monday, 14 April 1986 not having been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census night as well as those in residence, while usual residents temporarily absent from the area are excluded.

The date of the Census was chosen to coincide with a period when passenger movements were at a minimum and, consequently, the figures closely approximate to those for the normally resident population. Members of the Defence Forces who on Census night were serving abroad with the United Nations were excluded from the enumeration.

Conduct of the Census

The Census enumeration was carried out by a specially recruited temporary field force consisting of 327 fulltime supervisors and 3,221 part-time enumerators. The Census questionnaires were distributed during the three weeks immediately preceding the Census night and the collection of the completed questionnaires commenced the following day. The enumerators examined the questionnaires at the time of collection to ensure that they were correctly completed; and, where necessary, they assisted householders in their completion.

Production of Results

Each enumerator prepared in the first instance a summary of the population in his/her Enumeration Area. These summaries formed the basis for the provisional 1986 population results issued in two Census publications² within months of the Census date. The completed questionnaires for the individual households were subsequently transmitted to the Census Office for processing.

The enumeration summaries, dwelling listings and enumeration maps were checked for consistency in county order and used to determine the boundaries of Census Towns and suburbs/environs of towns with legal boundaries. The first stage clerical scrutiny and computer processing of the entries for date of birth, marital status and relationship to head of household on the Census questionnaire proceeded concurrently in the same county order. These two operations combined allowed the publication of the first set of final Census results in a special series of Local Population Reports as individual counties were completed over a seven month period commencing in July 1987. A summary report for the State was issued in November 1987.

¹ Made by the Minister of State at the Department of the Taoiseach in pursuance of powers conferred on him by Sub-Section 1 of Section 16 of the Statistics Act 1926 and the Statistics Acts 1926 and 1946 (Transfer of Ministerial Functions) Order 1949 (S.I. No. 142 of 1949) and the Statistics (Delegations of Ministerial Functions) Order 1983 (S.I. No. 13 of 1983).

² Census of Population of Ireland, 1986
Preliminary Population Figures (PI. 4224), 14 July 1986
Preliminary Report (PI. 4375), September 1986.

These operations also form the basis of the first three volumes of the detailed Census report. The computer processing of the remaining information on the Census questionnaires provided the basis for the second set of Local Population Reports published between November 1988 and June 1989 and for the second Summary State Report in November 1989. These further operations also form the basis for the remaining volumes of the detailed report.

A complete list of the reports on the 1986 Census published to date is given in Appendix 2.

Small Area Population Statistics (SAPS)

Small area population statistics for Urban Districts, Rural Districts, Towns, District Electoral Divisions, etc. from the 1986 Census are available on a commercial basis in two formats. One format contains detailed classifications of the population by age, sex and marital status and of households by size and by age, sex and marital status of the head of the household. Details of family units classified by size, age of youngest child, etc. are also provided.

The second format is more detailed and contains in addition classifications of the population by principal economic status, age and sex; classifications of persons at work by sex, employment status and broad industrial sector; classifications of persons at work, unemployed and retired by sex and occupational group; detailed classifications by socio-economic group, social class, age education ceased, ability to speak Irish, means of travel and distance travelled to work, etc.

These small area population statistics are available in the form of computer printout and magnetic tape. For full details of the contents and charges contact:

DEFINITIONS

Private and Non-Private Households

A *Private Household* is defined as a group of persons living together (usually but not necessarily related), jointly occupying the whole or part of a private dwelling house, flat or temporary dwelling and sharing a common budget. A person who lives alone or a person who occupies only part of the living accommodation but does not normally share a common budget with the other occupants is regarded as constituting a separate private household.

The details in Part 1 relate to all private households while the information in Part 2 refers to *private households in permanent housing units* and excludes households occupying caravans or other temporary dwellings (covered separately in Part 3).

A *Non-Private Household* is a boarding house, hotel, guest house, barrack, hospital, nursing home, boarding school, religious institution, welfare institution, prison or ship etc. However, proprietors and managers of hotels, principals of boarding schools, persons in charge of various other types of institutions and members of staff who, with their families, occupy flats on the premises are classified as private households.

Head of Household

This is the person in respect of whom information is entered on the first line of the Census questionnaire. Private households were free to choose any adult member present on Census night as the *head of household*.

Household Size

The number of persons in a household consists of the total number of persons present there on the night of Sunday, 13 April 1986, together with all persons who arrived in the household on the morning of Monday, 14 April 1986, not having been enumerated elsewhere.

The size and composition of a household, therefore, include visitors present in the household on Census night and exclude any usual residents of the household who were temporarily absent.

Family Units

A family unit or *nucleus* is defined as:

- (1) a husband and wife; or
- (2) a husband and wife together with one or more usually resident single children (of any age); or
- (3) one parent together with one or more usually resident single children (of any age).

The identification of family units is mainly based on the information returned on the Census questionnaire on the relationship of individual members to head of household. While in general the information was sufficient to enable family units to be properly classified, there were two particular circumstances in which it was not adequate.

Firstly, there were problems in identifying some unmarried parents with children as separate family units. This happened particularly where one unmarried parent with one or more children lived with his/her parents and the information given on the relationship to head of household did not clearly identify the parent/child relationship. In such cases, the unmarried parent and children were subsumed in another family unit. As a result of this the number of family units identified as consisting of a lone parent with children is probably underestimated to some degree.

Secondly, there were couples who, although not married, cohabited. Where it was clear from the Census form that this relationship existed a couple together with their children, if any, were classed as a family unit. Otherwise, they were classed as other persons who may or may not have been attached to another identifiable family unit in the household.

Finally, because the Census figures relate to the *de facto* population, the composition, size and type of family units are affected by temporary absences of regular members from households on Census night. In particular, the temporary absence of one parent from a household on Census night (e.g. in hospital, absent on business or holiday, etc.) reduced a two-parent unit to a one-parent unit. To the extent that this has occurred, the number of one-parent family units is overstated at the expense of two-parent units. The presence of visitors, including family members who usually live elsewhere, in households on Census night may also have had the effect of creating a second family unit in what is normally a one-family household or of attaching other persons to the usually resident family unit.

Family Cycle

Family Units are classified into thirty three family cycle stages allowing the summarisation of family cycles on the basis of youngest or oldest child. This classification was introduced in the 1981 Census of Population and has been used in the Labour Force Surveys conducted since 1981 and in the Household Budget Survey. Details for 1981 corresponding to Tables 33 and 34 are given in Appendix 1.

Household Composition

The composition of private households was classified in such a way as to provide data similar to those available from recent previous Censuses. On this occasion the former "Two or more persons but not including a family unit" category has been subdivided into "Non-family households containing related persons" and "Two or more persons not containing a family unit nor related persons".

The family unit forms the basis of the classification. Households containing family units are further classified into those with and those without other persons. Households containing more than one family unit are also separately distinguished as are one-person households. Household size and composition relate only to the persons present in the household on Census night.

The thirteen types of household used in the tabulations are:-

Households consisting of:-

- | | | |
|--|---|-----------------------|
| 1. One person only | | |
| 2. Couple | | |
| 3. Couple and one or more single children
(of any age) | } | with no other persons |
| 4. Lone mother and one or more single children
(of any age) | | |
| 5. Lone father and one or more single children
(of any age) | | |
| 6. Couple | | |
| 7. Couple and one or more single children
(of any age) | } | with other persons |
| 8. Lone mother and one or more single children
(of any age) | | |
| 9. Lone father and one or more single children
(of any age) | | |
| 10. Two family units with or without other persons | | |
| 11. Three or more family units with or without other persons | | |
| 12. Non-family households containing related persons | | |
| 13. Two or more persons not containing a family household
nor related persons | | |

It should be particularly noted that the age of children is not taken into account in defining the household type. For example, a household comprised of a couple and their child aged 10 years is assigned to Type 3 as is a household comprised of a couple and their son aged 30, if the son is unmarried and usually resident with them.

Marital Status

Information on marital status was sought in the following format:

MARITAL STATUS — for persons born on or before 13 April, 1971	
Was the person ever married? Please ✓ the appropriate box.	What is the marital status of persons who were ever married ("Yes" at Q. 5) Indicate the present actual marital status irrespective of the legal status. Please ✓ the appropriate box.
Yes ☐ 1 No ☐ 2	Widowed ☐ 1 Married but Separated: Remarried: Deserted ☐ 5 following widowhood..... ☐ 2 Marriage Annulled..... ☐ 6 following dissolution of previous Legally Separated..... ☐ 7 marriage (annulment or divorce) ☐ 3 Other Separated..... ☐ 8 Married ☐ 4 Divorced in another country.... ☐ 9

In the Tables the category *married* includes *remarried*, while *separated* includes persons recorded as *deserted*, *marriage annulled*, *legally separated*, *other separated* and *divorced in another country*.

COMMENTARY

The Commentary relates to all private households unlike corresponding commentaries for previous Censuses which related largely to private households in permanent housing units.

Private Households

The population enumerated at the 1986 Census was 3,540,643 persons of whom 3,442,303 were in private households and 98,340 were in non-private households. Of those in private households 3,413,171 were in permanent housing units while 29,132 were in temporary housing units.

There were in all 976,304 private households of which 964,882 were in permanent housing units and 11,422 were in temporary units. The average size of private households was 3.53 persons compared with 3.66 in 1981 and 3.93 in 1971.

Table A:- Private Households classified by Composition 1981 and 1986, showing the percentage change in each category.

Total	910,700	976,304	+ 65,604	+ 7.2

Between 1981 and 1986 the number of private households increased by 65,600 or 7.2 per cent. The number of one-person households increased by over 25,000 or 16.1 per cent. Despite the overall increase in household numbers, there were large variations among the particular household types. In general, households comprising single family units showed considerable increases; while multi-family households or households comprising family units together with other persons generally declined.

One-Person Households

In Table B one-person households are classified by age and sex of the household member for 1981 and 1986. The percentage changes from 1981 to 1986 are also shown.

Table B:- One-Person Households classified by age and sex of household member, 1981 and 1986.

Total	75,385	86,900	+ 15.3	80,341	93,893	+ 16.9

The number of males living alone increased by 11,500 and females by 13,600 between 1981 and 1986. There were particularly large proportionate increases for males in the 30-39 age groups and females in the 30-44 age groups. Between 1981 and 1986 the number of males over 65 years of age living alone increased by 3,900 or 16.3 per cent; for females the corresponding increase was 9,200 or 20.9 per cent.

Some 16.6 per cent of males and 24.7 per cent of females over 65 years of age were living alone. Both the higher female life expectancy and the tendency generally for females to marry older males are contributory factors to this sex difference. For example, of the 86,900 males living alone some 12,500 (14.3 per cent) are widowed; while of the 93,900 females some 46,300 (49.3 per cent) are widowed. Some 17.5 per cent of males and 26 per cent of females over 75 years of age were living alone.

Size of Household

As can be seen from Table C the trend towards smaller household size (i.e. number of persons in the household) which has been a feature for many years now, continued in the 1981-1986 period.

Table C:- Private Households classified by household size, 1981 and 1986.

Number of Persons in Household	Number of Households		Change 1981 - 1986	
	1981	1986	Actual	Per Cent

10	5,737	4,167	- 1,570	- 27.4
11	2,990	2,048	- 942	- 31.5
12 or more	3,035	1,895	- 1,140	- 37.6
Total	910,700	976,304	+ 65,604	+ 7.2

Between 1981 and 1986 households of all sizes up to 6 persons showed increases, while all sizes from 7 persons upwards showed declines. The largest increases, both in actual and percentage terms, were for one-person and four-person households. The number of households with 7 persons or more declined from 96,348 (10.6 per cent of the total) in 1981 to 84,168 (8.6 per cent of the total) in 1986.

Headship Rates

The "headship rates" - i.e. the percentage of males and females in various age or marital status groups who are heads of households - are sometimes used in conjunction with population projections to estimate future housing demand.

Table D shows the percentage of males and females in certain broad age groups who were heads of households in 1981 and 1986 – both for all types of household and also excluding one-person households.

Table D:- Percentage of Males and Females in certain broad age groups who were Heads of Households, 1981 and 1986.

Sex and Age Group	All types of households		Excluding one-person households	
	1981	1986	1981	1986
Males				
15-24 years	9.5	7.9	8.3	6.4
25-44 "	71.4	71.1	70.1	69.6
45-64 "	84.8	86.2	83.1	84.6
65 years and over	77.9	79.8	74.2	75.8
Females				
15-24 years	4.8	5.3	3.4	3.9
25-44 "	9.1	12.5	6.8	9.8
45-64 "	21.4	22.0	15.2	15.5
65 years and over	40.7	43.1	24.4	24.4

For all household types the headship rates for males aged 15-24 and 25-44 declined slightly between 1981 and 1986, while there were increases for the other age/sex groupings. If persons living alone are excluded the same patterns are evident but the main impact is the significant reduction in the headship rates for older females.

Table E gives similar headship rate data for certain marital status categories.

Table E:- Percentage of Single, Ever-Married and Widowed Males and Females who were Heads of Households, 1981 and 1986.

Sex and Marital Status	All types of households		Excluding one-person households	
	1981	1986	1981	1986
Males				
Single	20.1	20.0	9.9	9.0
Ever-married (excl. widowed)	90.9	91.5	90.8	91.4
Widowed	72.5	74.5	61.7	62.1
Females				
Single	15.7	16.5	7.2	7.8
Ever-married (excl. widowed)	5.3	7.5	4.7	6.8
Widowed	69.1	71.8	57.8	59.0

The headship rates for males are higher than for females in all marital status categories, but particularly so for married persons. The exclusion of one-person households significantly affects the rates for single and widowed males and females.

Family Units

In the earlier part of the commentary private households were analysed by type defined on the basis of the presence or absence on Census night of an identifiable family unit. In this section there is further analysis of the family units themselves and their composition.

Table F:- Number of Households, Number of Family Units and Number of Persons classified by composition of Household, 1986.

Composition of Household	Number of Households	Number of Identified Family Units	Total Number of Persons in the Household
Single family unit	713,780	713,780	3,011,866
Two family units	12,604	25,208	79,860
Three or more family units	164	492	1,477
Total with a family unit	726,548	739,480	3,093,203
One person households	180,793	—	180,793
Two or more persons but no family unit	68,963	—	168,307
Total in Private Households	976,304	739,480	3,442,303

The total number of family units (as defined) was 739,480 an increase of almost 32,000 since 1981. Households containing family units accounted for 3,093,203 persons; a further 349,100 persons were in private households not containing an identifiable family unit and the remainder of the population (98,340 persons) were in non-private households.

A very detailed classification of the population by five year age group, marital status and whether a member of a family unit or otherwise is given in Table 32. As mentioned previously there are important qualifications arising from the Census procedures and definitions which must be borne in mind when interpreting the figures — in particular the impact of temporary absences from the usual residence on Census night and the fact that an unmarried child of any age can be classified as a "child" in a family unit. Table G following, summarises the composition of family households using broad age groupings.

Table G:- Population in Family Households distinguishing Males and Females classified by position in Family Unit and by broad age group - 1986.

Of the 634,767 family units with both husband and wife (or couple) present, 502,649 or over 79 per cent had children. Over 82 per cent of the parents involved (79 per cent of males and 86 per cent of females) were under 55 years of age. For couples with no children present on Census night about 56 per cent were over 55 years of age.

There were 104,713 family units with just one parent present on Census night - 19,020 males and 85,693 females of whom 12,770 and 54,747 respectively were widowed, while 2,208 and 14,965 respectively were separated.

There were 1,400,795 children (as defined) in family units with both parents present, almost 67 per cent of these children were under 15 years of age with a further 28 per cent aged 15–24 years. There were 205,073 children in family units with only one parent present with 34 per cent being under 15 years of age and a further 34 per cent aged 15–24 years.

In addition to parents and children there were a further 113,088 persons in family households. Some 49,729 of these were over 55 years of age. The total included 7,297 widowed males and 26,151 widowed females.

Table H:– Family Units comprising Husbands and Wives (or Couples) classified by age of wife and age of youngest child in Family Unit – 1986.

About 21 per cent of the family units with both members of the couple present, had no children – roughly the same proportion as for 1981. Some 16 per cent of wives aged 25–34 had no children in 1986 compared with 13.9 per cent in 1981.

There were over 210,000 units where the youngest child was under 5 years of age and in more than half of them the wife was aged 25–34 years. In a further 177,000 units the youngest child was aged 5–14 years and just under half the wives were aged 35–44 years. There were 115,700 units where the youngest child was over 15 years of age and in almost 93 per cent of these the wife was aged 45 years and over.
