General Details

Introduction

A Census of Population was taken on the night of Sunday, 13 April 1986 in accordance with the Statistics (Census of Population) Order 1986 (S.I. No. 61 of 1986)¹. Copies of the Census questionnaire and of accompanying instructions are reproduced in Appendix 1 of Volume 1 of the detailed Census report.

This sixth volume of the detailed report, contains detailed results relating to the population aged 15 years and over classified by their principal economic status and by the industry in which working. The territorial divisions of the country distinguished in this report are defined in Appendices 2–4 of Volume 1.

Subsequent Census Volumes will analyse the population by such other characteristics as occupation and usual residence. The principal features of the 1986 Census results were published immediately they became available in two series of Local Population Reports.

Coverage

The Census figures relate to the *de facto* population – i.e. the population recorded for each area represents the total of all persons present within its boundaries on the night of Sunday, 13 April 1986, together with all persons who arrived in that area on the morning of Monday, 14 April 1986 who had not been enumerated elsewhere. Persons on board ships in port are included with the population of adjacent areas. The figures, therefore, include visitors present on Census night as well as those in residence, while usual residents temporarily absent from the area are excluded.

The date of the Census was chosen to coincide with a period when passenger movements were at a minimum and, consequently, the figures closely approximate to those for the normally resident population. Members of the Defence Forces who on Census night were serving abroad with the United Nations were excluded from the enumeration.

Conduct of the Census

The Census enumeration was carried out by a specially recruited temporary field force consisting of 327 fulltime supervisors and 3,221 part-time enumerators. The Census questionnaires were distributed during the three weeks immediately preceding the Census night and the collection of the completed questionnaires commenced the following day. The enumerators examined the questionnaires at the time of collection to ensure that they were correctly completed and, where necessary, they assisted householders in their completion.

Production of Results

Each enumerator prepared in the first instance a summary of the population in his/her Enumeration Area. These summaries formed the basis for the provisional 1986 population results issued in two Census publications² within months of the Census date. The completed questionnaires for the individual households were subsequently sent to the Census Office for processing.

The population summaries, dwelling listings and maps for individual Enumeration Areas were checked for consistency in County order and used to determine the boundaries of Census Towns and suburbs/environs of towns with legal boundaries. The first stage clerical scrutiny and computer processing of the entries for date of birth, marital status and relationship to head of household (questions 1–6) on the Census questionnaire proceeded concurrently in the same County order. These two operations combined allowed the publication of the first set of final Census results in a special series of Local Population Reports as individual counties were completed. These were issued over a seven month period commencing in July 1987. A summary report for the State was published in November 1987.

These operations also formed the basis of the first three volumes of the detailed Census report. The computer processing of the remaining information on the Census questionnaires provided the basis for a second set of Local Population Reports published between November 1988 and June 1989 and for the second Summary State Report issued in November 1989. This approach ensured that the principal Census results were published in a timely manner.

A complete list of the reports on the 1986 Census published to date is given in Appendix 1.

No. 142 of 1949) and the Statistics (Delegation of Ministerial Functions) Order 1983 (S.I. No. 13 of 1983).

Small Area Population Statistics (SAPS)

Small area population statistics for Urban Districts, Rural Districts, Towns, District Electoral Divisions, etc. from the 1986 Census are available on a commercial basis in two formats. One format contains detailed classifications of the population by age, sex and marital status and of households by size and by age, sex and marital status of the head of the household. Details of family units classified by size, age of youngest child, etc. are also provided.

The second format is more detailed and contains in addition classifications of the population by principal economic status, age and sex; classifications of persons at work by sex, employment status and broad industrial sector; classifications of persons at work, unemployed and retired by sex and occupational group; detailed classifications by socio-economic group, social class, age education ceased, ability to speak Irish, means of travel and distance travelled to work, etc.

Principal Economic Status

The principal economic status was determined for persons aged fifteen years and over on the basis of the responses to the following Census question:

PRESENT STATUS	
Indicate, by inserting ✓ in the appropriate box, the person's present principal status.	
Self-employed persons should insert ✓ in Box 1.	
Persons temporarily absent from work because of illness, holidays, etc., should insert ✓ in Box 1.	
At work ☐ 1	Home (i.e. domestic) duties ☐ 5
Seeking regular work for first time ☐ 2	Retired ☐ 6
Unemployed ☐ 3	Unable to work owing to permanent sickness or disability ☐ 7
	Other ☐ 8
At school, student ☐ 4	Specify

The following more specific instructions as to how the question should be answered were given in the explanatory notes attached to the Census questionnaire:

- (i) *Self-employed persons should insert ✓ in Box 1.*
- (ii) *Persons temporarily absent from work because of illness, holidays, etc., should insert ✓ in Box 1.*
- (iii) *Apprentices who are in employment and who also attend technical schools or colleges of technology should insert ✓ in Box 1.*
- (iv) *Fulltime students who are in part-time employment should insert ✓ in Box 4.*

Apart from the foregoing explanatory notes no further guidance was given as to how the categories distinguished in Q.15 should be interpreted. The answers, therefore, represent the subjective assessment of the person completing the form and may differ from what would be obtained by personal interview in the annual Labour Force Survey.

Labour Force

The labour force comprises persons whose principal economic status is either at work, looking for first regular job or unemployed having lost or given up previous job (i.e. categories 1, 2 and 3 of Q.15).

The labour force and its constituent figures shown in this Volume are directly based on the Census. There are slight differences between the figures derived from the Census and the official mid-April 1986 Labour Force estimates which are contained in the annual series of Labour Force Survey reports.

Industry

The industrial classification was determined for persons aged 15 years and over on the basis of the responses to the following Census question:

EMPLOYER AND EMPLOYER'S BUSINESS

For persons at work, if an employee, state name of employer (person, firm, company or public body) and nature of business carried on by the employer.

If self-employed, state nature of business carried on.

A farmer or farm worker should also state the area of the land farmed.

If unemployed, state name and nature of business of last employer.

In addition the following instructions as to how the question should be answered were given in the explanatory notes attached to the Census questionnaire:

This question should be answered in respect of each person, aged 15 years or over who is at work or unemployed.

(a) For a person at work:—

(i) If an employee, state the name of the employer (whether person, firm, company or public body) and the nature of the business carried on by the employer.

(ii) If self-employed, state the nature of the business carried on.

(iii) If a farmer or a farm worker, state also the area (in statute acres) of the land farmed (i.e. including land taken and excluding land let).

(b) For an unemployed person, state the name and nature of business of the last employer.

The nature of business carried on should be described fully indicating the type of goods made or dealt with, or type of service rendered; for example, use descriptions such as "Shirt Factory", "Shoe Manufacturer", "Cattle Dealer", "Wholesale Tea Merchant", "Import Agent (Textiles)", etc.

Descriptions such as "Factory", "Manufacturer", "Dealer", "Merchant", "Agent", should not be used alone.

The next question on the Census questionnaire asked persons to give the full address at which they worked. Sometimes the information on the nature of employer's business entered on the Census questionnaire is not sufficiently precise to enable it to be accurately classified. In many of these cases the additional information on name and address of the employer allows the coders to identify the nature of business precisely with the aid of trade directories, etc.

The industry in which a person is engaged is determined (whatever the occupation) by the main economic activity carried out in the local unit at which he or she works. If, however, the local unit provides an ancillary service to another unit (e.g. administration, storage, etc.) in the business then the persons in the ancillary unit are classified to the industry of the unit it services. Thus, while the occupational classification is concerned only with the particular work performed by an individual regardless of the activity carried on at the local unit, the industrial classification is concerned only with the ultimate purpose of the unit or end product regardless of the precise nature of the work performed by each individual. A manufacturing or commercial unit may employ persons with many different occupations for the purpose of making a particular product or for giving a particular service. Conversely, there are cases in which particular occupations are largely confined to a single industry. For example, the majority of persons with agricultural occupations are in the agriculture industry and most miners are in the mining industry.

The term *industry* as used for Census of Population purposes is not confined to manufacturing industry. It is synonymous with the term "sector of economic activity". The basis of the industrial classification is, in the case of employees, the business or profession of their employer and in the case of self-employed persons the nature of their own business or profession.

The detailed level of industries used in the 1986 Census classification is given in Appendix 2, while the intermediate level of industry groups used is given in Appendix 3.

Occupation

All persons aged 15 years and over who were at work, unemployed (other than first job seekers) or retired were classified in the Census to their usual (or previous) principal occupation on the basis of the responses to the following Census question:

OCCUPATION
If at work, state here the usual principal occupation, giving a full description.
If unemployed or retired, describe the principal occupation previously held.
For students or persons at school, state the type (Secondary, Community, Vocational, University, etc.).

The following more specific instructions as to how the question should be answered were given in the explanatory notes attached to the Census questionnaire:

- (i) *If at work, state the usual principal occupation (i.e. that by which the living is mainly earned).*
- (ii) *If unemployed or retired, describe the principal occupation previously held.*
- (iii) *In all cases describe the occupation fully and precisely, using any special name by which the job is known and stating the type of work done. The following are examples of the types of occupational descriptions which should be used:*

*Hosiery Machine Operator
Woodworking Machinist
Sound Technician
Laboratory Technician*

*Gas Fitter
Electrical Fitter
Garage Foreman
Site Foreman*

*Dock Labourer
Builder's Labourer
Civil Engineer
Electrical Engineer*

*Ticket Checker
Goods Checker
Radio Mechanic
Motor Mechanic*

General terms such as "Machine Operator", "Technician", "Labourer", "Engineer", "Fitter", "Foreman", "Checker", "Mechanic", should not be used alone.

- (iv) *For civil servants and local government employees, the grade should be stated and for Army or Garda personnel, the rank should be stated.*
- (v) *For teachers, the branch of teaching should be stated, e.g. "Primary teacher", "Vocational teacher", etc.*
- (vi) *For clergy and members of religious orders engaged in teaching or other service, a full description should be given such as "Christian Brother, primary teacher", "Nun, general hospital nurse", etc.*
- (vii) *For students or persons at school, state the type of school or institution, e.g. "Secondary", "Community", "Vocational", "University", etc.*

A person's occupational classification is determined by the kind of work performed in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc. The most detailed level of occupations used in the 1986 Census classification is given in Appendix 4.

Employment Status

Each person, at work, unemployed or retired was classified by "employment status" to one of the following groups:

- (1) Employer or own account worker
- (2) Assisting relative
- (3) Employee
- (4) Out of work

The Census question relating to employment status was formulated as follows:

EMPLOYMENT STATUS If at work please ✓ the appropriate box to indicate person's present employment status. If unemployed or retired, indicate the person's previous employment status.	
Self-employed, with paid employees	☐ 1
Self-employed, without paid employees	☐ 2
Employee	☐ 3
Assisting relative (not receiving a fixed wage or salary)	☐ 4

Marital Status

Information on marital status was sought in the following format:

MARITAL STATUS – for persons born on or before 13 April, 1971			
Was the person ever married? Please ✓ the appropriate box.	What is the marital status of persons who were ever married ("Yes" at Q.5) Indicate the present actual marital status irrespective of the legal status. Please ✓ the appropriate box.		
Yes ☐ 1 No ☐ 2	<table style="width: 100%;"> <tr> <td style="width: 50%;"> Widowed ☐ 1 Remarried: following widowhood ☐ 2 following dissolution of previous marriage (annulment or divorce) ☐ 3 Married ☐ 4 </td> <td style="width: 50%;"> Married but Separated: Deserted ☐ 5 Marriage Annulled ☐ 6 Legally Separated ☐ 7 Other Separated ☐ 8 Divorced in another country ☐ 9 </td> </tr> </table>	Widowed ☐ 1 Remarried: following widowhood ☐ 2 following dissolution of previous marriage (annulment or divorce) ☐ 3 Married ☐ 4	Married but Separated: Deserted ☐ 5 Marriage Annulled ☐ 6 Legally Separated ☐ 7 Other Separated ☐ 8 Divorced in another country ☐ 9
Widowed ☐ 1 Remarried: following widowhood ☐ 2 following dissolution of previous marriage (annulment or divorce) ☐ 3 Married ☐ 4	Married but Separated: Deserted ☐ 5 Marriage Annulled ☐ 6 Legally Separated ☐ 7 Other Separated ☐ 8 Divorced in another country ☐ 9		

In the Tables the category *married* includes *remarried*, while *separated* includes persons recorded as *deserted*, *marriage annulled*, *legally separated*, *other separated* and *divorced in another country*.

Commentary

Principal Economic Status

Table A shows the number of persons aged 15 years and over classified by principal economic status and sex for both 1981 and 1986.

The total population aged 15 years and over increased by 116,266 persons (+4.8 per cent) from 2,399,676 in 1981 to 2,515,942 in 1986. Females (+5.5 per cent) contributed more to this increase than males (+4.2 per cent). There was a decline of 46,672 in the number of persons at work between 1981 and 1986. This consisted of a decline of 67,352 in the number of males at work which was partly off-set by an increase of 20,680 in the number of females at work. There was a substantial increase of 105,096 (+78.8 per cent) in the number of persons unemployed or looking for a first regular job between 1981 and 1986. While the increase for males was 72.4 per cent, the number of females in these categories more than doubled. Overall, the labour force (i.e. those at work, unemployed or looking for a first regular job) increased by 58,424 persons, consisting of an increase of only 7,805 males along with a more substantial increase of 50,619 in the number of females.

Student numbers increased by nearly 45,000 over the five years. This increase was shared fairly evenly between males and females. The number of persons on home duties fell by about 1½ per cent between 1981 and 1986. The residual category "others", which includes retired persons, showed an increase of about 8 per cent over the same period with males accounting for most of the rise.

Table B gives a breakdown of the population aged 15 years and over by broad age group and sex within the main principal economic status categories in 1986. As already stated the labour force consists of those at work, unemployed or looking for a first regular job.

Table B: Persons, males and females aged 15 years and over, classified by principal economic status and age group – 1986.

The table indicates that for each of the economically active age groups (i.e. 15–64) there were more males in the labour force than in any of the other principal economic status categories. By contrast this relationship only held for females in the 15–24 age group. For the remaining economically active age groups the category "home duties" predominated for females. This category was also the most prevalent in the case of females aged 65 and over whereas for males the residual category "Others", which includes retired persons, accounted for most of the 65 and over age group. In 1986, there were just over 245,200 students, of whom 50.5 per cent were females. Most of the students were concentrated in the 15–24 age group.

The contrast between the positions of males and females can be seen more clearly from Table C which shows the percentage of males and females aged 15 years and over classified by age group and principal economic status.

Table C: Percentage of persons, aged 15 years and over, in each age group, classified by principal economic status – 1986.

While labour force participation rates (i.e. those in the labour force expressed as a percentage of the relevant population total) were higher across all age groups for males than for females the differential was most marked in the case of the 35–44 and 45–54 age groups. The age group with the highest female labour force participation rate was the 15–24 age group. Thereafter, the rate declined with older age groups reflecting the effects of marriage and childbearing on women's participation in the labour force. Approximately seven in every ten women in the 35–44 and higher age groups were engaged in home duties in 1986.

Labour Force Participation Rates by Age Group

Table D provides an analysis of labour force participation rates in 1986 by sex and five year age group. It also provides comparative data for 1971 and 1981.

Overall, male labour force participation declined from 82 per cent in 1971 to 76.4 per cent in 1981 and then to 74 per cent in 1986. This decline was most marked in the 15–19 age group as well as in the 60–64 and higher age groups. Conversely, there was an increase in overall female labour force participation over the same fifteen year period despite a decline in the rate for the 15–19 age group. The increasing female labour force participation was manifested in all age groups from 20–24 to 50–54 inclusive.

In Table E the labour force participation rates for females aged 20–54 years are disaggregated according to marital status.

Table E: Labour force participation rates for females aged 20–54 years in each marital status category – 1971, 1981 and 1986.

The table indicates increases in labour force participation rates for both single and married females between 1971, 1981 and 1986 in all five year age groups apart from single 20–24 year olds, where there was a decrease. The increases were most marked in the case of married women, particularly in the younger age groups. The opposite trend held for widowed females – each of the five year age groups displaying a fall in labour force participation rates between 1971, 1981 and 1986.

Analysis of Persons at Work by Industrial Group and Planning Region

Table F analyses the numbers of persons at work by planning region and by broad industrial group and shows the percentage distribution by industrial group within each region.

In overall terms the eastern region accounted for about 40 per cent of total employment in 1986. The dominance of this region in sectors outside of agriculture is particularly evident from Table F. Almost half of all persons at work in the service type industries and almost 40 per cent of those in production industries were enumerated in the eastern region. By way of contrast, the western region, which accounted for just over 8 per cent of total employment, had a 15 per cent share of agricultural employment in 1986.

There were 166,937 persons at work in agriculture, forestry and fishing in 1986 compared to 314,282 in production industries and 609,936 in services, the latter representing approximately 56 per cent of total employment. The change over time in the relative share of total employment accounted for by the three broad sectors of economic activity is illustrated in Figure 1. The figure shows the percentage distribution of persons at work by broad economic sector for selected censuses since 1926, and the diminishing importance of agriculture in terms of the numbers at work is clearly evident. The growth of the services sector, particularly since 1961 is also evident.

The main contributors to the overall decline of about 47,000 in the number of persons at work between 1981 and 1986 were agriculture, forestry and fishing (–21,600), manufacturing industry (–22,900) and building and construction (–26,300). For the most part these decreases were confined to males. The losses in these sectors were offset by gains in the services sector, particularly professional services (+16,300) and personal services (+6,800). Females accounted for 23,000 of the 26,600 employment gain in the services sector.

Table H shows the change in the number at work between 1981 and 1986 in each of the main industrial sectors in each planning region.

All regions, experienced a decline in employment between 1981 and 1986 apart from Donegal where there was a marginal increase. Agricultural employment declined throughout, the largest percentage declines being in the North West, Donegal and the North East. Again with the exception of Donegal all other regions saw industrial employment decreases, the most pronounced losses being in the East and South West. Service sector employment increased in every region between 1981 and 1986, the most marked increases in percentage terms being in the West and South East.

Employment Status

Table I classifies persons, males and females at work in 1986 by employment status with comparative information for 1981. Derived actual and percentage changes are given in Table J.

Table I: Employment status in 1986 of persons, males and females with comparative figures for 1981.

Employment status	1981			1986		
	Persons	Males	Females	Persons	Males	Females

Total at work	1,137,827	808,670	329,157	1,091,155	741,318	349,837

Some 836,600 or approximately 77 per cent of persons at work were classified as employees in 1986. Employers and own account workers accounted for almost 222,900 persons or a further 20 per cent, while assisting relatives numbered less than 31,700 and comprised only 3.0 per cent of persons at work.

Employees accounted for 40,800 of the 46,700 decline in the number of persons at work between 1981 and 1986. These were mainly in the non-agricultural sectors where the fall in employee numbers was partly off-set by increases in the number of employers and own-account workers and assisting relatives. By contrast the fall in agricultural employment related mainly to employers and own-account workers, while the influence of assisting relatives continues to diminish (i.e. a fall of about 1,000 to 21,400).
