### Definitions

#### Regional Authorities

The geographical sub-divisions used in Tables 3 and 30 are based on Regional Authorities. These eight regions were established under the Local Government Act, 1991, Regional Authorities Establishment Order, 1993 which came into operation on 1 January 1994.

Name of region	Constituent counties	Type of area
Border	Cavan	Administrative county
	Donegal	Administrative county
	Leitrim	Administrative county
	Louth	Administrative county
	Monaghan	Administrative county
	Sligo	Administrative county
Dublin	Dublin	City
	Dún Laoghaire-Rathdown	Administrative county
	Fingal	Administrative county
	South Dublin	Administrative county
Mid-East	Kildare	Administrative county
	Meath	Administrative county
	Wicklow	Administrative county
Midland	Laoighis	Administrative county
	Longford	Administrative county
	Offaly	Administrative county
	Westmeath	Administrative county
Mid-West	Clare	Administrative county
	Limerick	City
	Limerick	Administrative county
	Tipperary North	Administrative county
South-East	Carlow	Administrative county
	Kilkenny	Administrative county
	Tipperary South	Administrative county
	Waterford	City
	Waterford	Administrative county
	Wexford	Administrative county
South-West	Cork	City
	Cork	Administrative county
	Kerry	Administrative county
West	Galway	City
	Galway	Administrative county
	Mayo	Administrative county
	Roscommon	Administrative county

For the 1991 and previous censuses, the geographical sub-divisions used were Planning Regions.

## Appendix 2 (contd.)

### Irish Language

A new question on ability to speak the Irish language and frequency of speaking Irish was introduced in the 1996 Census of Population. The new version of the question marked a major departure from the version used in previous censuses. The version used in those years asked respondents to write “Irish only”, “Irish and English”, “Read but cannot speak Irish” or to leave blank as appropriate. While the revised version used in 1996 is more direct, “Can the person speak Irish?”, and also includes a question on frequency of speaking Irish, a major drawback is that it gives rise to a discontinuity with the results of previous censuses. The version introduced in 1996 was retained unchanged for 2002.

### Gaeltacht Areas

The Gaeltacht Areas Orders, 1956, 1967, 1974 and 1982 defined the Gaeltacht as comprising 155 Electoral Divisions or parts of Electoral Divisions in the counties of Cork, Donegal, Galway, Kerry, Mayo, Meath and Waterford.

### Labour Force

The results of the Quarterly National Household Survey (QNHS) provide the basis for the official series of quarterly labour force estimates. The labour force and its constituent figures shown in this report are directly based on the census. Users should be aware that information derived from identical questions in the census and QNHS for the relevant quarter of the same year may show appreciable differences. The main categories affected are the constituents of the question on principal economic status, the International Labour Organisation (ILO) definition of employment and the employment estimates classified by industry and occupation.

The main reasons for the differences are:

- the census form is completed by a responsible adult in each household throughout the State in respect of everyone present in the household on census night while the QNHS is by face to face interview
- the census relates to all persons present in the State (including visitors from abroad) at the time of the census while the QNHS covers persons usually resident in Ireland
- the census is a complete enumeration while the QNHS is a sample survey
- the QNHS has a much wider range of questions on the labour force which may have a bearing on the responses received to individual questions.

### Occupation

The Occupation classification (set out in Appendix 3) used in the census, is based on the UK Standard Occupational Classification<sup>4</sup>, with modifications to reflect Irish labour market conditions. The classification was first used in the 1996 Census. This classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). The hierarchical structure provided within this classification is suited to accurate automatic coding.

The code to which a person’s occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation “clerk” covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.

The intermediate level of occupational groups is given in Appendix 4 while the most detailed level of occupations for which information from the 2002 Census is published is given in Appendix 3.

## Appendix 2 (contd.)

### Socio-economic Group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition a residual group entitled "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status. The detailed classification used for determining the socio-economic group of all persons at work, unemployed or retired is given in Appendix 5.

Persons on home duties or at school/college, who are members of a family unit, were classified to the socio-economic group of the person in the family on whom they were deemed to be dependent. Thus, if the head of a family was at work, unemployed or retired, dependent persons were assigned to his/her socio-economic group. If the head was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.) or if his/her occupation was not known, they were assigned to the socio-economic group of the principal earner in the family - if there was no such earner, they were assigned to the **unknown** socio-economic group. Other persons engaged in home duties or at school/college who were not members of a family unit, such as persons living alone or relatives of a head of household who were not members of the family unit (e.g. widowed grandparents, etc.), were assigned to the **unknown** group.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

### Social Class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation:

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible. The detailed classification used for determining the social class group of all persons at work, unemployed or retired is given in Appendix 6.

## Appendix 2 (contd.)

### Private Household

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat or bedsitter.

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on census night.

### Family Units

A family unit *or nucleus* is defined as:

- (1) a husband and wife or a cohabiting couple; or
- (2) a husband and wife or a cohabiting couple together with one or more usually resident never-married children (of any age); or
- (3) one parent together with one or more usually resident never-married children (of any age).

Family members have to be usual residents of the relevant household.

The identification of family units is based on the information returned on the census questionnaire, particularly the details provided on the relationship to Person 1. In general, the information is sufficient to enable family units to be properly classified.

However, there may be a limited number of cases where an unmarried parent with one or more children lives with his/her parents and the information given on the relationship to Person 1 does not clearly identify the parent/child relationships. In such cases, the unmarried parent and children are subsumed in another family unit. As a result of this the number of family units identified as consisting of unmarried parents with children is probably understated to some degree.
