Regional Authorities

The geographical sub-divisions used in Tables 4, 5, 10 and 12 are based on Regional Authorities. These eight regions were established under the Local Government Act, 1991, Regional Authorities Establishment Order, 1993 which came into operation on 1 January 1994.

Appendix 2 (contd.)

Aggregate Town and Aggregate Rural Areas

The population in the Aggregate Town Area is defined as those persons living in population clusters of 1,500 or more inhabitants. For this purpose a town with a legally defined boundary is classified on the basis of its total population including any suburbs or environs.

The population residing in all areas outside clusters of 1,500 or more inhabitants is classified as belonging to the Aggregate Rural Area. The Aggregate Rural Area is a statistical concept and is not related to the former Rural District administrative unit.

Private Household

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements - that is, sharing at least one meal a day or sharing a living room or sitting room.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat or bedsitter (see question H1 on the second page of the census form).

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on census night (see question H1 on the second page of the census form).

Birthplace and Nationality

It should be noted that the figures for foreign-born persons shown in table 14 exclude visitors to the country. Similarly, the figures for non-Irish persons shown in table 15 exclude visitors to the country.

Labour Force

The results of the Quarterly National Household Survey (QNHS) provide the basis for the official series of quarterly labour force estimates. The labour force and its constituent figures shown in this report are directly based on the census. Users should be aware that information derived from identical questions in the census and QNHS for the relevant quarter of the same year may show appreciable differences. The main categories affected are the constituents of the question on principal economic status, the International Labour Organisation (ILO) definition of employment and the employment estimates classified by industry and occupation.

The main reasons for the differences are:

- the census form is completed by a responsible adult in each household throughout the State in respect of everyone present in the household on census night while the QNHS is by face to face interview
- the census relates to all persons present in the State (including visitors from abroad) at the time of the census while the QNHS covers persons usually resident in Ireland
- the census is a complete enumeration while the QNHS is a sample survey
- the QNHS has a much wider range of questions on the labour force which may have a bearing on the responses received to individual questions.

Appendix 2 (contd.)

Principal Economic Status (PES) Classification

The PES classification is based on a single question (question 24) in which respondents are asked how they would describe their present principal status and given the following response categories:

- Working for payment or profit
- Looking for first regular job
- Unemployed
- Student or pupil
- Looking after home/family
- Retired from employment
- Unable to work due to permanent sickness or disability
- Other, write in

ILO Labour Force Classification

The ILO Labour Force classification distinguishes the following main subgroups of the population aged 15 years and over:

In Employment: Persons who worked in the week before Census Day for one hour or more for payment or profit, including work on the family farm or business and all persons who had a job but were not at work because of illness, holidays, etc. in the week.

Unemployed: Persons who, in the week before Census Day, were without work and available for work within the next two weeks, and had taken specific steps, in the preceding four weeks, to find work.

Inactive Population (not in labour force): All other persons.

The labour force comprises persons employed plus unemployed.

Occupation

The Occupation classification (set out in Appendix 3) used in the census, is based on the UK Standard Occupational Classification⁴, with modifications to reflect Irish labour market conditions. The classification was first used in the 1996 Census. This classification adheres to the international occupation classification ISCO Com (88) and provides a link to ISCO Com (88). The hierarchical structure provided within this classification is suited to accurate automatic coding.

The code to which a person's occupation is classified is determined by the kind of work he or she performs in earning a living, irrespective of the place in which, or the purpose for which, it is performed. The nature of the industry, business or service in which the person is working has no bearing upon the classification of the occupation. For example, the occupation "clerk" covers clerks employed in manufacturing industries, commerce, banking, insurance, public administration, professions and other services, etc.

The intermediate level of occupational groups is given in Appendix 4 while the most detailed level of occupations for which information from the 2002 Census is published is given in Appendix 3.

Socio-economic Group

The entire population was classified to one of ten specific socio-economic groups (introduced in 1996). In addition a residual group entitled "All others gainfully occupied and unknown" was used where sufficient details were not provided. The classification aims to bring together persons with similar social and economic statuses on the basis of the level of skill or educational attainment required. In defining socio-economic group no attempt is made to rank groups in order of socio-economic importance.

⁴ Standard Occupational Classification, Second edition, HMSO, London, 1995.

Appendix 2 (contd.)

The socio-economic group of persons aged 15 years or over who are at work is determined by their occupation and employment status. Unemployed or retired persons aged 15 years or over are classified according to their former occupation and employment status. The detailed classification used for determining the socio-economic group of all persons at work, unemployed or retired is given in Appendix 5.

Persons on home duties or at school/college, who are members of a family unit, were classified to the socio-economic group of the person in the family on whom they were deemed to be dependent. Thus, if the head of a family was at work, unemployed or retired, dependent persons were assigned to his/her socio-economic group. If the head was neither at work, unemployed nor retired (e.g. never worked, permanently disabled, etc.) or if his/her occupation was not known, they were assigned to the socio-economic group of the principal earner in the family - if there was no such earner, they were assigned to the **unknown** socio-economic group. Other persons engaged in home duties or at school/college who were not members of a family unit, such as persons living alone or relatives of a head of household who were not members of the family unit (e.g. widowed grandparents, etc.), were assigned to the **unknown** group.

The socio-economic groups used in the census are as follows:

- A Employers and managers
- B Higher professional
- C Lower professional
- D Non-manual
- E Manual skilled
- F Semi-skilled
- G Unskilled
- H Own account workers
- I Farmers
- J Agricultural workers
- Z All others gainfully occupied and unknown

Social Class

The entire population is also classified into one of the following social class groups (introduced in 1996) which are defined on the basis of occupation:

- 1 Professional workers
- 2 Managerial and technical
- 3 Non-manual
- 4 Skilled manual
- 5 Semi-skilled
- 6 Unskilled
- 7 All others gainfully occupied and unknown

The occupations included in each of these groups have been selected in such a way as to bring together, as far as possible, people with similar levels of occupational skill. In determining social class no account is taken of the differences between individuals on the basis of other characteristics such as education. Accordingly social class ranks occupations by the level of skill required on a social class scale ranging from 1 (highest) to 7 (lowest). This scale combines occupations into six groups by occupation and employment status following procedures similar to those outlined above for the allocation of socio-economic group. A residual category "All others gainfully occupied and unknown" is used where no precise allocation is possible. The detailed classification used for determining the social class group of all persons at work, unemployed or retired is given in Appendix 6.
