Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1874, ...	110-113
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1874, ...	114-121
Deaths from several Zymotic and other Causes in 1874, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties, ...	122-125
Topographical Description of the Eight Registration Divisions of Ireland, ...	126

APPENDIX.

Letter to the Registrar-General on the Causes of Death in Ireland in 1874, from WILLIAM M. BURKE, Esq., F.C.P.I., ...	127-136
Copy of Circular relating to Registration of Roman Catholic Marriages, ...	137
Index of Superintendent Registrars' Districts, and of Registrars' Districts, ...	138-145

REPORT

TO

His Grace, JAMES, DUKE OF ABERCORN, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR GRACE,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16, and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Grace, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1874.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1874, was presented to Parliament in the Session of 1875. The Report now submitted contains detailed tables of the Ages and Condition of persons Married; of Births, distinguishing legitimate from illegitimate; and of Deaths, and their Causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 791 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1874 was 5,314,844; the persons whose marriages were registered during the year, amounted to 48,962, the number of marriages being 24,481; children born alive whose births were registered, amounted to 141,288; and the number of deaths registered was 91,961. The emigrants from Ireland during the year 1874 were 73,184. In the previous year—1873—there were *registered* 25,730 marriages, 144,377 births, and 97,537 deaths; the number of emigrants was 90,149.

MARRIAGES.

24,481 marriages were registered in Ireland during 1874, being in the proportion of 1 marriage to every 217 of the *estimated* population.

571 men and 2,905 women contracted marriage before they had attained their twenty-first year. The proportion of males married under age was 2·33; of females, 11·87 per cent.

Of widowers, 2,777, and of widows, 1,437 were re-married; the proportion to the total marriages being 11·34 per cent. of widowers, and 5·87 per cent. of widows.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded, by comparing the number who write their names in the registers, with the number who make a mark. Of 48,962 persons married in 1874, 16,284 (7,367 men and 8,917 women) signed the registers with marks; being in the proportion of 33·26 per cent.—30·09 per cent. of the males, and 36·42 per cent. of the females married. In the year 1864, 38·6 per cent. of the males, and 50·3 per cent. of the females married, signed the register by marks.

In 1874 the marriage register was signed by mark by both parties in 5,637, and by one or other of the persons married in 4,970 instances—thus in 10,627, or 43·4 per cent. of the total number of marriages registered, one or both of the persons married signed by mark.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are “of full age” or “minors,” the precise age at marriage is not always entered in the registers. In 1874 the exact ages of both parties were given in 7,415 instances. Of these 6,606 were bachelors, and 7,000 spinsters; 809 were widowers, and 415 widows. The largest number of wives married between the ages of 21 and 30—the number being 4,417, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—4,104—also married between 21 and 30 years of age.

222 bachelors were married to widows, both of whose ages at the time of marriage are recorded. 105 of these widows and 93 of the bachelors married between 25 and 35 years of age. 616 of the marriages in which the ages of both parties were recorded, were between widowers and spinsters, 333 of the former being between the ages of 30 and 45, and 405 of the latter between 21 and 35.

Of widowers and widows married, whose ages at the time of marriage were stated, there were 193 couples. Of these the largest number of widows were between 35 and 45, and of widowers between 50 and 60.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O’Hagan, M.P.; and James A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the

occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate *previous* to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to the Act coming into operation.

The number of marriages registered in each of the eleven years 1864–74; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Number of Marriages in the Eight Divisions of Ireland during the years 1864–74, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.*

Registration Divisions.			Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

		1873	3,867	67.8	58.3	2.64	13.71	11.40	7.63
	1874	3,637	70.1	62.6	2.20	13.45	9.73	6.79	

The extent and position of each of these divisions are specified at p. 126.

Of the total number of marriages (24,481) registered in 1874, 17,348 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 7,133 marriages were of members of the various Protestant persuasions. Of the latter marriages 3,914 were in churches and chapels of the late Established Church, 2,365 in Presbyterian

Meeting-houses, 299 in "Registered Buildings," 547 in the Registrars' offices, 7 according to the usages of the Society of Friends, and 1 marriage was between members of the Jewish persuasion.

Of the entire number of marriages in 1874 there were contracted in the quarter ending the last day of March, 9,309; of June, 5,123; of September, 4,921; of December, 5,128.

The following table gives a statement showing in continuation of the return in my report for 1873, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1874, and the Mode in which the Marriages were solemnized.*

Years ended 31st December	Marriages.												
	According to the Rites of the late Established Church.						Not according to the Rites of the late Established Church.						Total Marriages registered under 7 & 8 Vic., cap. 81.

There is not any return made to me of the places of worship belonging to Roman Catholics, in which marriages are celebrated; but under the provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting

* The 7 and 8 Vic., c. 81, came into operation 1st April, 1845.

† The increase in the number of marriages by Special Licence and in those on Registrar's Certificate in 1871 is caused by the provisions of sections 36 and 38 of "The Matrimonial Causes and Marriage Law (Ireland) Amendment Act, 1870," and the decrease of Marriages on Registrar's Certificate, in 1872 and subsequent years by the operation of sections 25, 26, and 27 of 34 & 35 Vic., cap. 49.

other religious persuasions, that there were 1,506 Churches and Chapels of the late Established Church, 593 registered Presbyterian Meeting-houses, and 275 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1874. During the year 1874 there was a decrease of 3 such places in the late Established Church; an increase of 3 in the Presbyterian Church; and an increase of 9 in other religious communities. The "Registered Buildings" belong to the following denominations:

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists, ...	154	Church Methodists, ...	1
Reformed Presbyterians, ...	36	Covenanters, ...	1
Independents, ...	21	United Original Seceders, ...	1

During the year 1874 there were issued by the Registrars, 649 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary :—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1874.	Number of Registered Meeting-houses on 31st December, 1874.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland, ...	125	554	2,330
2. Remonstrant Synod of Ulster, ...	9	21	37
3. Presbytery of Antrim, ...	4	9	10
4. United Presbytery or Synod of Munster, ...	3	4	1
5. Northern Presbytery of Antrim, ...	1	5	16
Total, ...	142	593	2,394

BIRTHS.

The births registered in Ireland during 1874, amounted to 141,288. Of these, 72,516 were males, and 68,772 females, being in the proportion of 105 boys to every 100 girls.

The rate per cent. of births to the *estimated* population was 2·66, or 1 in 37·6 of the population.

There were 3,265 illegitimate births, of which 1,694 were those of males, and 1,571 females; the proportion to the total number of births being 2·3 in every 100. The highest rates, 4·6 and 2·6, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in the years 1870-74.

TABLE IV.—*The Per-centage of Legitimate and Illegitimate Births registered in Ireland during the years 1870–74, by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1870.	1871.	1872.	1873.	1874.	1870.	1871.	1872.	1873.	1874.

South-Western, . . .	98·3	98·4	98·6	98·7	98·7	1·7	1·6	1·4	1·3	1·3

36,584 births were registered during the quarter ended 31st March; 38,514 in that ended 30th June; 33,831 during that ended 30th September and 32,359 in that ended 31st December.

DEATHS.

The deaths registered in 1874 amounted to 91,961—46,474 males, and 45,487 females—being in the proportion of 1·73 per cent. of the *estimated* population, or in the ratio of 1 *registered* death to every 58 persons.

The following table shows the per-centage of mortality at different ages:—

TABLE V.—*The Per-centage of the Total Deaths which occurred at each Age-period, according to the Registration of Deaths in Ireland, during the Years 1864–1874, by Sexes.*

Of the persons whose deaths were registered during the year 26'38 in every 100 were children under 5 years old—27'83 per cent. of the males and 24'90 per cent. of the females. 15'83 per cent. of the males, and 17'54 per cent. of the females, whose deaths were registered had passed their 75th year. 72 of the males and 89 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

25,770 deaths were registered during the first quarter of the year; 24,063 during the second; 19,538 during the third; and 22,590 during the fourth quarter.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several seaports, the number of emigrants who left Ireland during the year 1874 amounted to 73,184; of these, 39,096 were males and 34,088 females. Of the whole number, 11,710 were from Leinster; 24,272 from Munster; 27,734 from Ulster; and 9,451 from Connaught: 17 persons did not state the county or province to which they belonged.

Of the emigrants in 1874, 16'7 per cent. were under 15 years of age; 69'4 per cent. were 15 to 35 years old; and 13'9 per cent. were 35 and upwards.

METEOROLOGY.

The following particulars have been extracted from Returns of Meteorological Observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the years 1864-74, furnished by Colonel Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The mean height of the barometer during the year 1874 was 29'948 inches, against an average of 29'916 inches for the preceding ten years. The highest reading during the year (30'821) was on the 6th March, at 9.30 P.M., air calm, and the lowest (28'595 inches) was on the 11th December, at 3.30 P.M., wind W.

The mean temperature for the year was 49'0°; the highest registered was 81'3° on the 18th July, and the lowest was 22'5° on the 5th February. The average mean temperature for the years 1864-73 was 49'5°.

Rain or snow fell on 186 days during the year, the amount being 27'833 inches. The average annual rain-fall for the preceding ten years was '938 in. less, while the average number of days on which rain or snow fell annually, in that period, was 192.

During the year 1874, Westerly winds were even more prevalent than usual, the number of days on which it blew from one of the three points, S.W., W., N.W., at 9.30 A.M., being 237 against an average of 202 days in the ten years 1864-73. The prevailing wind was the W., it having blown from that point on 119 days, with an average pressure of 2'26 lbs. per square foot. The strongest winds, S.W., were on the 27th March and 2nd April, the pressure being 25 lbs. per square foot.

* Latitude 53° 21' 44' 65", north; longitude 6° 21' 6' 35", west. Height above the sea 158'8 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

I beg here to repeat the observations made in my former Reports, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1874 do not show any improvement compared with previous years:—

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in the years 1865-74]:—

COUNTRIES.	RATIO TO POPULATION.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864], ...	1 in 42	1 in 61	1 in 207
IRELAND [in 1865], ...	1 " 39	1 " 61	1 " 183
IRELAND [in 1866], ...	1 " 38	1 " 60	1 " 185
IRELAND [in 1867], ...	1 " 38	1 " 59	1 " 187
IRELAND [in 1868], ...	1 " 38	1 " 64	1 " 200
IRELAND [in 1869], ...	1 " 37	1 " 61	1 " 200
IRELAND [in 1870], ...	1 " 36	1 " 60	1 " 189
IRELAND [in 1871], ...	1 " 36	1 " 61	1 " 186
IRELAND [in 1872], ...	1 " 36	1 " 55	1 " 199
IRELAND [in 1873], ...	1 " 37	1 " 55	1 " 207
IRELAND [in 1874], ...	1 " 38	1 " 58	1 " 217
England [in 1864], ...	1 " 28	1 " 42	1 " 116
Scotland [in 1864], ...	1 " 28	1 " 42	1 " 137
Sweden [in 1864], ...	1 " 30	1 " 50	1 " 145
Prussia (Old Provinces) [in 1864], ...	1 " 24	1 " 38	1 " 116
Hanover [in 1864], ...	1 " 30	1 " 44	1 " 124
Wurtemberg [in 1864], ...	1 " 23	1 " 31	—
Hanse Towns: Bremen [in 1864], ...	1 " 28	1 " 37	1 " 105
Holland [in 1864], ...	1 " 30	1 " 42	1 " 127
France [in 1864], ...	1 " 38	1 " 44	1 " 127
Spain [in 1864], ...	1 " 26	1 " 32	1 " 127
Austria (exclusive of Hungary) [in 1864], ...	1 " 25	1 " 31	1 " 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

Registered	1864.	1865.	1866.	1867.	1868.	1869.	1870.	1871.	1872.	1873.	1874.
Births, .	186,414	144,970	146,090	144,388	146,051	145,659	149,846	151,355	149,278	144,377	141,288
Deaths, .	93,144	93,154	93,027	93,503	86,185	89,593	90,462	88,348	97,294	97,537	91,961
Marriages,	27,406	30,802	30,121	29,742	27,699	27,277	28,667	28,960	26,948	25,730	24,481

Following this Report are summaries of the Quarterly Reports issued in 1874, and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be

Your Grace's very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

GENERAL REGISTER OFFICE,

CHARLEMONT HOUSE,

Dublin, 29th April, 1876.

SUMMARY OF THE QUARTERLY REPORTS

ISSUED IN 1874.

TABLE I.—Showing, by **Quarterly Periods**, the number of **Marriages** registered in Ireland in 1871, 1872, 1873, and 1874, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant under the 7 & 8 Vic., cap. 81 :—

QUARTERLY PERIODS.		Years and Number of Marriages Registered.

Marriages.—There were 9,309 marriages registered in Ireland during the first quarter of 1874, a number affording an annual ratio of 1 in every .143, or .701 per cent., of the *estimated* population. The average number of marriages registered in the corresponding quarter of the years 1869–73 was 10,893.

Births.—The births registered during the first quarter of the year 1874 amounted to 36,584—18,916 boys and 17,668 girls—affording an annual ratio of 1 in every 36.3, or 2.75 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the previous five years was 40,005.

Deaths.—There were 25,770 deaths—13,002 males and 12,768 females—registered during the quarter, affording an annual ratio of 1 in 51.6, or 1.94 per cent., of the *estimated* population. The average number registered during the first quarter of the preceding five years was 28,219.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st March, 1874, amounted to 11,464—7,432 males and 4,032 females. The average number of emigrants during the corresponding quarter of the preceding five years was 11,799.

Diseases.

The decrease in the number of deaths registered during the first quarter of 1874 compared with corresponding quarter of previous years, was due more to the mildness of the season than to any improvement in the sanitary condition of the country. The deaths from the principal zymotic diseases showed an increase of 195 as compared with the last quarter of 1873. With very few exceptions, the Registrars who refer to the subject report most unfavourably as regards the sanitary condition of their districts. One or two illustrations may suffice. The Registrar of No. 3 district, Belfast, referring to a court in which typhoid fever prevailed, says:—“All the back yards in this court were most filthy, and the privies were overflowing.” The Registrar of Emly, Tipperary, makes the following observation:—“It is my opinion that nearly half the sickness is due to overcrowding in the damp, filthy cabins of the poor, where it is not at all an uncommon thing to see four or five human beings, two pigs, a goat, a cow, and a score of fowl, with perhaps a donkey, inhabiting in common one small room.”

Small-pox.—There were registered from this disease 145 deaths, being an increase of 70 on the number registered during the last quarter of 1873, and a decrease of 18 as compared with the March quarter of the same year. Of the deaths from small-pox 134 occurred in the province of Ulster, 10 in Leinster, and 1 in Munster; Connaught escaped altogether. The source of infection could, in nearly all instances, be clearly traced to Scotland. The benefits resulting from vaccination and re-vaccination were abundantly evidenced by the modified form of the disease, and the trifling mortality as compared with its virulence, confluency, and fatality in those unprotected by vaccination. It would appear from the report of the Registrar of Mountcharles District, Donegal Union, that inoculation is (despite the vigilance of the authorities) still carried on; he states that—“Small-pox has been brought into the district by inoculation, and the disease is now spreading over the greater part of the entire district; almost all the cases that I have seen in this and the adjoining district were of the confluent form.”

Measles.—To this disease 214 deaths were referred; in the corresponding quarter of 1873, 559 persons died from measles. Of the 214 deaths from rubeola, 111 were contributed by the province of Leinster, 15 by Munster, 63 by Ulster, and 25 by Connaught.

Scarlet Fever.—779, or 1 in every 34, of the total deaths registered during the quarter, resulted from this pestilence. In the corresponding quarter of 1873 the number registered was 435. The deaths from scarlet fever were distributed among the four provinces as follows:—Leinster 312, Munster 181, Ulster 247, and

Quarterly
Reports.

First
Quarter.

Connaught 39. The Registrar of Tullamore makes the following report:—"Scarlatina in a very malignant form appeared in the town of Tullamore in the month of January. The disease was brought to a crowded school by a pupil recently recovered from it; 9 children were almost immediately infected, of whom 5 died; 3 adults took it from them, all of whom recovered. The disease did not extend to the poorer class."

Diphtheria.—During the quarter the number of deaths registered from diphtheria was 140, against 76 in the corresponding quarter of the year 1873. Diphtheria proved most fatal in the same provinces as did scarlet fever. In the province of Leinster 41 persons died from this disease, in Munster 27, in Ulster 64, and in Connaught 8.

Whooping-cough.—The deaths from whooping-cough numbered 604, showing an increase of 97 as compared with the corresponding quarter of 1873. Of the 604 deaths from whooping-cough, 183 occurred in Leinster, 196 in Munster, 143 in Ulster, and 82 in Connaught. The Registrar of No. 1 District, Drogheda, reports that—"Whooping-cough was epidemic during the quarter, and was very fatal. In my experience, no child under 12 months attacked by this disease has recovered. I am sorry to say that no medicine seems to have the least effect in controlling it."

Fever.—The deaths from this disease amounted to 845, against 905 in the March quarter of 1873. In the province of Leinster the deaths from fever numbered 250, in Munster 215, in Ulster 289, and in Connaught 91. The Registrar of No. 2 District, Newry, states that—"Several cases of typhus fever have occurred; all these were in houses unfit for human habitation, badly ventilated, and kept in a filthy condition;" and, with a view of proving the benefits resulting from cleanliness, he adds that—"In other parts of the town, where cleanliness was observed, fever of this kind has been absent."

Diarrhoea.—This disease caused 409 deaths, showing a decrease of 116 as compared with the first quarter of 1873.

Simple Cholera.—This disease was the cause of 11 deaths, against 9 in the first quarter of 1873.

Inquests.—There were 688 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 38 of the total deaths registered. In Leinster there was 1 inquest to every 32 deaths registered; in Munster 1 to 35; in Ulster 1 to 44; and in Connaught 1 to 48.

Deaths in Public Institutions.—Of the 25,770 deaths registered during the quarter, 3,762, or 14.5 per cent., occurred in Public Institutions. In Leinster the per-centage was 19.0; in Munster 17.6; in Ulster 10.5; and in Connaught 9.1.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 31st March, 1874, was 9d., being one penny higher than in the corresponding period of 1873; in the first quarter of 1864 the average price was 6d.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 20s. per cwt.; during the first quarter of the previous year it was 16s. 4d. In the corresponding period of 1864 it was only 11s.

At the Dublin Potato Market the average prices of potatoes during the quarter ranged from 4s. 4d. to 5s. 10d. per cwt., against 4s. 6d. to 9s. 6d. in the corresponding quarter of 1873; the average prices for the first quarter of 1864 were only 2s. 6d. to 3s. 3d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 54s. 6d. to 80s. per cwt., against 65s. to 80s. 6d. in the corresponding quarter of 1873; for the first quarter of 1864 the average prices were 51s. 6d. to 64s. 6d.

The following statement shows the average prices of the above-mentioned articles of food in Dublin during the first quarter of the years 1864-74 :—

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1874 was 52,029, against 52,916 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 31,886 against 32,012 for the first quarter of 1873.

Of the persons receiving in-door relief during the first quarter of 1874 an average number of 602 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 566.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the first quarter of the year 1874 was 30·021 inches, against an average of 29·811 inches for the corresponding quarter of the previous five years; the highest reading (30·821 inches) was on the 6th March, at 9.30 P.M., air calm; and the lowest (28·702 inches) on the 26th February, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 42·3°, against an average of 42·2° for the first quarter of the years 1869-73. The maximum temperature was 61·9°, and the minimum 22·5°.

Rain or snow fell on 43 days during the quarter. The rain-fall measured 5·264 inches against an average of 6·811 inches for the first quarter of the previous five years. The greatest monthly rain-fall was in January, when 2·265 inches were registered.

The wind blew on 34 days from W., on 24 from S.W., on 12 from S., on 6 from S.E., on 4 from N.W., on 2 each from N., N.E., and E., and on 4 days the air was calm, at 9.30 A.M.

Second Quarter.—April, May, June.

Second
Quarter.

Marriages.—The number of marriages registered in Ireland during the second quarter of 1874 amounted to 5,123, equal to an annual ratio of 1 in every 259, or 386 per cent., of the estimated population. The average number registered in the corresponding period of the preceding five years was 5,406.

Births.—The births registered during the second quarter of 1874 amounted to 38,514—19,671 boys and 18,843 girls—affording an annual ratio of 1 in every 34·5, or 2·90 per cent., of the estimated population. The average number of births registered during the corresponding quarter of the preceding five years was 40,159.

Quarterly
Reports.Second
Quarter.

Deaths.—There were 24,063 deaths—12,176 males and 11,887 females—registered during the quarter, affording an annual ratio of 1 in 55·2, or 1·81 per cent., of the *estimated* population. The average number *registered* during the second quarter of the previous five years was 24,352.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th June, 1874, amounted to 34,317—17,732 males and 16,585 females. The average number of emigrants during the corresponding quarter of the preceding five years was 36,530.

Diseases.

The deaths *registered* during the second quarter show a decrease of 2,049 as compared with the corresponding period of the year 1873, and of 1,707 as compared with the first quarter of 1874. From the eight principal zymotic diseases 2,983 persons died ; in the corresponding quarter of 1873 and the first quarter of 1874, the number of deaths from the forenamed diseases was 3,010 and 3,147 respectively.

The temperature during the quarter was slightly above the average, and the rain-fall was 1·563 inches below the average.

Small-pox.—The deaths from small-pox registered during the quarter numbered

127, against 145 in the first three months of the year, and 233 in the corresponding three months of the year 1873. Of the deaths from this disease 111 occurred in the province of Ulster, 12 in Connaught, 1 in Leinster, and 3 in Munster. In a great many instances the disease was imported from Scotland; some persons arrived from that country while labouring under the disease. Notwithstanding the vigilance of the Constabulary and the action taken on previous occasions by the Poor Law Commissioners, the baneful practice of inoculation is being carried on, and the present law against inoculation has proved inoperative. The Registrar of the Dunkineely District, Donegal Union, has furnished the following report:—“It is a sad reflection, which I think it my duty to mention, viz., that the 6 cases of death from small-pox recorded, and which were of the ages respectively of 12, 12, 11, 17, 16, 14, (not merely infants,) were inflicted and caused by the hand of man, under the vile practice of inoculation, which has been extensively carried on in these more remote and backward parts of our country, and which, it seems to me, the law as it stands is powerless to prevent, requiring, as it does, the conviction of the person or persons who did the inoculation, whereas, if the law were modified to this extent, simply to hold the parents or guardians of the child—the parties really guilty of the violation of the law—responsible to the laws, on simply seeing the evidence of inoculation, by whomsoever done, the efficiency of the law, I cannot but suppose, would soon be apparent.” Dunkineely is not the only district in Ireland where inoculation is practised, the Registrar of Mountcharles District, Donegal Union, in his report for the first quarter of the year, refers to cases of small-pox of the confluent form resulting from inoculation.

Fever.—The deaths from fever registered during the quarter amounted to 914, against 845 in the preceding quarter, and 1,014 in the second quarter of the year 1873. In proportion to the population the deaths from fever were nearly equally distributed throughout the four provinces. 92 of the deaths from fever occurred in the Dublin Registration District; one-half of these resulted from typhoid or enteric fever.

Scarlet Fever.—761 persons fell victims to scarlet fever; in the corresponding quarter of the previous year the deaths from this disease amounted to 388, and in the first quarter of 1874 to 779. 176 of the deaths from scarlet fever occurred in the Dublin Registration District. In some localities the disease was of a very malignant nature; in No. 2 District, Belfast, 2 cases proved fatal within forty-eight hours.

Whooping-cough.—515 deaths were caused by whooping-cough, showing a decrease of 89 as compared with the preceding quarter, and an increase of 70 on the number registered during the second quarter of 1873. Of the 35 deaths registered in the Jamestown District, Carrick-on-Shannon, 7 resulted from whooping-cough. Few families in the Roosky District, Strokestown Union, escaped this disease, which in 4 instances terminated in death. 7 of the 35 deaths registered in the Carrickbyrne District, New Ross Union, were caused by whooping-cough.

Diphtheria.—125 deaths were caused by diphtheria, against 140 in the preceding quarter, and 56 in the June quarter of the year 1873. The deaths from diphtheria were distributed among the four provinces as follows:—Leinster, 55; Munster, 10; Ulster, 56; and Connaught, 4.

Measles.—The deaths from measles numbered 165, showing a diminished mortality of 49 as compared with the preceding quarter, and 186 when compared with the second quarter of 1873.

Diarrhœa.—357 deaths were ascribed to diarrhœa, against 409 in the preceding quarter, and 507 in the second quarter of 1873.

Simple Cholera.—Only 19 deaths were attributed to simple cholera.

It is satisfactory to find that the sanitary condition of some few localities has been ameliorated during the quarter. The Registrar of the Drogheda District, No. 1, says in his report, that—“The district is very healthy at present, due, I should say, in a great measure, to the compulsory sanitary arrangements enforced on the town, and which were recommended in a conjoint report furnished to the Local Government Board Inspector by my colleague, Dr. Kelly, and myself. This

Quarterly
Reports.
Second
Quarter.

report, I may mention, had reference to the absence of sewers in some of the principal streets, and to the deficiency of the water supply." The Registrar of the Termonfeckin District, Drogheda Union, reports that the sanitary condition of his district has been improved. The Registrar of the Ballyhooly District, Fermoy Union, states that—"The villages have been cleaned since my last report;" he adds, however, "The water of Ballyhooly is very bad still." Thorough drainage has been completed in Drogheda-row, Monasterevin, and with beneficial results. But if some few districts have been rendered more healthful by sanitary improvements, many others remain in a wretched condition. Among these may be instanced Banbridge; the Registrar of this district, referring to an outbreak of typhoid fever, observes—"The occurrence of this epidemic naturally drew attention to the water supply, and the Town Commissioners had the water analyzed by Mr. Cameron, analyst to the city of Dublin. His report was simply appalling. Of the seventeen pumps not one yielded pure water, and four were contaminated so much as to be actually dangerous." The drainage, he adds, is most imperfect; many houses having no yards, the refuse is thrown out upon the public streets, and "when the rain comes, all is washed into the drains, and a portion oozes into the adjoining wells, so that an epidemic of cholera or typhoid fever means, in plain language, that people are drinking a solution of human excrement." The water supply and the sewerage are both bad in Downpatrick. The Registrar of No. 2 District, Cork, in despair, says—"My district has been in a very bad sanitary condition from the time that I first took charge of it up to the present, and I have come to the conclusion that it is sheer waste of time to trouble myself writing any more sanitary reports." It is not surprising to find neglect as to sanitation in the provinces, when Dublin, the metropolis, continues to be, in consequence of neglected sanitation, one of the most unhealthy towns in the kingdom.

Inquests.—There were 643 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 38 of the total deaths registered. In Leinster there was 1 inquest to every 35 deaths registered; in Munster 1 to 35; in Ulster 1 to 38; and in Connaught 1 to 49.

Deaths in Public Institutions.—Of the 24,063 deaths registered during the quarter, 3,610 or 15.0 per cent., occurred in Public Institutions; in Leinster the per-centage was 19.5; in Munster 18.4; in Ulster 9.8; and in Connaught 12.1.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf, for the quarter ending 30th June, 1874, was 8½d., which was ½d. higher than the average price for the corresponding period of 1873; in the second quarter of 1864 the average price was 6d.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 21s. per cwt.; during the second quarter of the previous year it was 17s. 5d. In the corresponding period of 1864 it was only 10s. 6d.

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 4s. 4d. to 7s. per cwt., against 4s. 8d. to 10s. 4d. in the corresponding quarter of 1873; the average prices for the second quarter of 1864 were only 2s. 11d. to 3s. 8d.

The average prices of beef at the Dublin Cattle market during the quarter were 57s. to 81s. per cwt., against 67s. to 89s. in the corresponding period of the year 1873; for the second quarter of 1864 the average prices were 53s. to 65s. 6d.

The following statement shows the average prices of the above-mentioned articles of food, in Dublin, during the second quarter of the years 1864-74 :—

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of the year 1874 was 47,986, against 47,818 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 31,991, against 31,452 during the second quarter of 1873.

Of the persons receiving in-door relief during the second quarter of 1874 an average number of 572 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 567.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the second quarter of 1874, was 30.006 inches, against an average of 29.927 inches for the corresponding quarter of the preceding five years; the highest reading (30.617 inches) was on the 15th June, at 9.30 A.M., wind N.E.; and the lowest (28.826) on the 2nd April, at 9.30 P.M., wind S.W. The mean temperature of the air during the quarter was 52.1°, against an average of 51.9° for the corresponding period of the preceding five years. The maximum temperature was 73.5°, and the minimum 27.0°. Rain fell on 38 days during the quarter. The rain-fall measured 3.745 inches, the average amount for the second quarter of the years 1869-73 being 5.308 inches. The greatest monthly rain-fall during the quarter was in May, when 1.994 inches were registered. The wind blew on 16 days from W., on 15 days from S.W., on 13 days from E., on 10 days each from N. and N.E., on 9 days from N.W., on 8 days from S., on 6 days from S.E., and the air was calm on 4 days, at 9.30 A.M.

Third Quarter.—July, August, September.

Third
Quarter.

Marriages.—The number of marriages registered in Ireland during the third quarter of 1874 amounted to 4,921, equal to an annual ratio of 1 in every 270, or .370 per cent., of the estimated population. The average number registered in the corresponding period of the preceding five years was 5,293.

Births.—There were 33,831 births registered in Ireland during the quarter ended 30th September, 1874—17,340 boys and 16,491 girls—representing an annual ratio of 1 in every 39.3, or 2.55 per cent., of the estimated population; the average number of births registered during the corresponding quarter of the preceding five years was 34,022.

Deaths.—The deaths registered in Ireland during the third quarter of the year 1874 amounted to 19,538—10,035 males and 9,503 females—affording an annual ratio of 1 in every 68.0, or 1.47 per cent., of the estimated population. The average number registered during the corresponding quarter of the previous five years was 18,597.

Quarterly
Reports.Third
Quarter.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1874, amounted to 17,688—8,970 males and 8,718 females. The average number who emigrated during the corresponding quarter of the previous five years was 17,285.

TABLE showing for each **Registration Province and County** in Ireland the Annual Rate per 1,000 of the estimated Population, represented by the number of **Marriages, Births, and Deaths** registered in the Quarter ended 30th September, 1874.

Diseases.

The number of deaths registered in Ireland during the quarter ended September 30th, is 342 in excess of the number registered during the corresponding period of 1873. That the sanitary condition of the country was in a very unsatisfactory state is fully evidenced by the fact of the increased mortality having resulted from eight of the principal zymotic diseases, the deaths from which exceeded by 728 those registered in the corresponding quarter of 1873, and by 240 those in the second quarter of 1874.

Small-pox.—This disease proved fatal in 135 instances, showing an increase of 8 as compared with the preceding quarter, and 102 as compared with the third quarter of 1873. The deaths from small-pox were distributed through the provinces in the following order:—Ulster, 89; Connaught, 42; Munster, 3; and Leinster, 1. The Registrars of Balla District, Castlebar Union, and Kiltamagh District, Swineford Union, attribute the prevalence of small-pox in their localities to the practice of inoculation.

Scarlet Fever.—This fearful disease, which has been epidemic for more than twelve months, instead of manifesting any symptoms of abatement, continues its fatal progress with increased malignity. The deaths from scarlet fever registered during the third quarter numbered 1,019, showing an increased mortality of 258 as compared with the preceding quarter, and of 594 as compared with the corresponding quarter of 1873. The disease prevailed chiefly in the provinces of Leinster and Ulster; in the former province the deaths from scarlet fever amounted to 477, and in the latter to 415; whereas in Munster and Connaught only 66 and 61 deaths were, respectively, the result of this disease. Some of those attacked by scarlet fever succumbed to the disease within a few hours; in a few instances two, three, and four members of the same family were cut off. The Registrar of the Denburb District, Dungannon Union, in referring to the disease having simultaneously attacked four children of one family, remarks that “the contagion seems to have been imported from Glasgow, through the medium of old clothes sent by a person there to the diseased family.” That the fatality of the disease is in a great measure dependent on the sanitary condition of the district is fully evidenced by the remarks of the various Registrars in whose districts scarlet fever prevailed, and all can testify to the truthfulness of the following observation, which is the result of the experience of the Registrar of Newry, No. 2, viz.:—“The epidemic diseases (scarlatina, measles, and whooping-cough,) above referred to, have in this district been most prevalent, and deaths most numerous in proportion to the number attacked, in the neighbourhood of offensive odours.”

Diphtheria.—This disease caused 141 deaths, against 125 in the previous quarter and 72 in the third quarter of 1873. Where scarlet fever was most fatal, there also the deaths from diphtheria were most numerous. It is not improbable that in many cases of scarlet fever where the throat symptoms were most prominent, the fatal results were attributed to diphtheria.

Measles.—One hundred and thirty-seven deaths were caused by measles, against 235 in the corresponding quarter of the preceding year and 165 in the June quarter of 1874. In some districts, measles and scarlet fever prevailed at the same time; an epidemic of the former occurred in Glengariff.

Whooping-cough.—To this disease 517 deaths were ascribed, against 515 in the preceding quarter and 420 in the corresponding quarter of 1873. The distribution of the deaths from whooping-cough among the four provinces was as follows:—Leinster, 66; Munster, 189; Ulster, 131; and Connaught, 131. In the Keady District, Armagh Union, a severe epidemic of whooping-cough prevailed; scarcely a family escaped; “it attacked persons of all ages, from the infant of a few days old to persons over 60, and proved fatal in 17 cases.” Fifteen of the 37 deaths registered in the Turloughmore District, Galway Union, resulted from whooping-cough. The Registrar reports that—“The children in the low bog villages were numerically more affected with whooping-cough than those living in the hilly parts of the district, and the mortality was proportionately higher.” The Registrar of the Glengariff District, Bantry Union, states that whooping-cough and measles were epidemic at the same time, and adds:—“In some instances the cause of death was registered as whooping-cough and measles.” Eleven of the 28 deaths registered in Rosscarbery District, Clonakilty Union, were caused by whooping-cough. Thirteen deaths were registered in the Tullagh District, Skibbereen Union; of these, 8 resulted from whooping-cough.

Fever.—To the various forms of continued fever 718 deaths were ascribed, against 914 in the preceding quarter and 648 in the third quarter of the year 1873.

Diarrhœa.—Four hundred and ninety-nine deaths were attributed to diarrhœa, against 615 in the corresponding quarter of the preceding year and 357 in the June quarter of 1874; they were distributed as follows:—in Leinster, 170; in Munster, 120; in Ulster, 182, and in Connaught only 27.

Simple Cholera.—Only 57 deaths were ascribed to this disease, of which number 20 occurred in Leinster, 22 in Munster, 13 in Ulster, and 2 in Connaught.

The sanitary improvements in certain districts have been considerable, and fol-

Quarterly
Reports.Third
Quarter.

lowed by the most satisfactory results. For instance, the Registrar of Lisburn, who has so repeatedly animadverted on the wretched sanitary condition of his district, reports as follows:—"I am happy to observe there is a very marked improvement already in the sanitary state of Lisburn and its vicinity, though but a very short time under the Towns Improvement Act. . . . I am glad to say that, on inquiry, I find there are not at present any cases of either fever, small-pox, or other infectious diseases in Lisburn Workhouse." As a sample of some of the districts where no sanitary improvements have been attempted, the following description of Scrabby District, Granard Union, by the Registrar, may be cited. In reference to the mortality from scarlet fever, he says:—"I fear the disease was greatly spread by want of proper sanitary arrangements in the district. In some of the houses I have seen a pig-house built in a corner of the kitchen or principal apartment of the house, and a patient in scarlatina in a bed beside it, a goat tied in another corner, and a cesspool in front of the house; indeed, in a great number of houses, in the remote parts of the district, it is a common thing to see the family living in the same house with the cattle." There is no reason to doubt that, if the same improvements as regards cleanliness, &c., were carried out in Scrabby as have been in Lisburn, there would be a like diminution of preventable disease. At the same time, it must be borne in mind that the enforcement of sanitary reforms is surrounded with the greatest difficulties, and must take considerable time in its accomplishment.

Inquests.—There were 653 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 30 of the total deaths registered. In Leinster there was 1 inquest to every 26 deaths registered; in Munster 1 to 26; in Ulster 1 to 34; and in Connaught 1 to 51.

Deaths in Public Institutions.—Of the 19,538 deaths registered during the quarter, 2,697 or 13·7 per cent., occurred in Public Institutions; in Leinster the per-centage was 16·2; in Munster 16·9; in Ulster 10·5; and in Connaught 10·9.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the quarter ending 30th September, 1874, was 7½*d.*, being ½*d.* cheaper than in the corresponding period of 1873, and 1½*d.* dearer than in the third quarter of 1864.

At the Dublin Corn Exchange the average price of oatmeal for the quarter was 16*s.* 8*d.* per cwt.; in the third quarter of the previous year it was 18*s.* 3*d.*, while in the corresponding quarter of 1864 it was only 10*s.* 8*d.*

At the Dublin Potato market the average prices of potatoes during the quarter ranged from 4*s.* to 5*s.* 10*d.* per cwt., against 5*s.* 6*d.* to 7*s.* 4*d.* in the corresponding period of the previous year; the average prices for the third quarter of 1864 were only 2*s.* 7*d.* to 3*s.* 10*d.*

The average prices of beef at the Dublin Cattle market during the quarter were 52*s.* 6*d.* to 77*s.* 6*d.* per cwt., against 66*s.* 6*d.* to 84*s.* 6*d.* in the corresponding period of the previous year; for the third quarter of 1864 the prices were 51*s.* to 62*s.* 6*d.*

The following statement shows the average prices of the above-mentioned articles of food in Dublin, during the third quarter of the years 1864-74:—

1874	7½	16 8	4 0	to 5 10	52 6	to 77 6

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of the year 1874 was 43,784, against 42,607 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 28,613, against 29,171 for the third quarter of 1873.

Of the persons receiving in-door relief during the third quarter of the year 1874 an average number of 563 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 557.

Reports.

Third
Quarter.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the third quarter of the year 1874, was 29·900 inches, against an average of 29·970 inches for the corresponding quarter of the preceding five years; the highest reading (30·490 inches) was on the 21st August, at 9.30 p.m., the air being calm; and the lowest (29·343 inches) on the 22nd September, at 9.30 a.m., wind S.S.E.

The mean temperature of the air during the quarter was 58·3°, against an average of 58·4° for the corresponding period of the preceding five years; the maximum temperature was 81·3° and the minimum 34·3°.

Rain fell on 54 days during the quarter. The rain-fall measured 9·821 inches, against an average of 7·867 inches for the third quarter of the years 1869–73. The greatest monthly rain-fall during the quarter was in August, when 5·086 inches were registered.

The wind blew on 31 days from S.W., on 30 days from W., on 9 days from N.W., on 7 days from E., on 6 days from S., on 2 days each from N.E. and S.E., and the air was calm on 5 days, at 9.30 a.m.

Fourth Quarter.—October, November, December.

Fourth
Quarter.

Marriages.—There were 5,128 marriages registered in Ireland during the fourth quarter of 1874, a number affording an annual ratio of 1 in every 259, or ·386 per cent., of the *estimated* population. The average number of marriages registered in the corresponding quarter of the previous five years was 5,923.

Births.—There were 32,359 births registered in Ireland during the quarter ended 31st December, 1874—16,589 boys and 15,770 girls—representing an annual ratio of 1 in every 41·1, or 2·44 per cent., of the *estimated* population. The average number of births registered during the corresponding quarter of the preceding five years was 33,917.

Deaths.—The deaths registered in Ireland during the fourth quarter of the year 1874 amounted to 22,590—11,261 males and 11,329 females—a number affording an annual ratio of 1 in every 58·8, or 1·70 per cent., of the *estimated* population. The average number registered during the corresponding quarter of the previous five years was 21,479.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 31st December, 1874, amounted to 9,715—4,962 males and 4,753 females. The average number of emigrants during the fourth quarter of the preceding five years was 10,569.

Diseases.

The state of the public health during the fourth quarter was far from satisfactory. The number of deaths registered exceeded by 1,160 those registered in the corresponding quarter of the previous year, and by 3,052 the number in the third quarter of 1874.

The excessive mortality is mainly attributable to the prevalence and fatality of scarlet fever, which disease destroyed not less than 1,475 persons; the words "not less" are introduced advisedly, for there can be little doubt that very many deaths resulting from scarlet fever have been returned under the head of dropsy, a very common sequence of the scarlatinal poison.

The wave of scarlet fever broke with unequal force over the four provinces. Ulster suffered most, having lost 836 persons; next in order came Leinster, where 460 deaths occurred; then in Connaught there were 108 deaths, and the remaining 71 deaths took place in Munster.

During the first quarter of the year scarlet fever killed 779 persons; in the second quarter 761; in the third quarter 1,019, and, as before stated, in the quarter under consideration 1,475; thus making a total of 4,034 victims to this plague.

The report of the Registrar of the Kilrea District, Ballymoney Union, affords further proof, if such were needed, of the very contagious nature of the disease, and is also of great importance in demonstrating the extreme tenacity with which the

Quarterly
Reports.Fourth
Quarter.

contagion or *materies morbida* clings to a habitation where scarlet fever had existed. His statement is as follows:—"Scarlet fever caused 5 deaths in November. The contagion was brought from Coleraine into the family of a labourer of this town, with whose three young children it rapidly assumed a malignant form, and ended fatally. When the first case appeared, the other children were removed from the house; but on their return within a month, they soon caught the disease, though the premises had been limewashed and thoroughly ventilated."

The Registrar of the Rathcoole District, Celbridge Union, attributes the outbreak of scarlet fever in his district to contagion brought from a distant "wake-house."

Diphtheria caused 159 deaths; of which number 84 occurred in Ulster, 53 in Leinster, 18 in Munster, and 4 in Connaught. In the Coleraine Union there were 10 deaths from this disease, 8 of which took place in the Articlave District, where the total deaths amounted to 29. At Warrenspoint, in the Newry Union, of the 40 deaths registered 11 resulted from diphtheria. The Registrar complains of the sanitary state of the town, stating that "the lanes are overcrowded," and that "there is neither proper sewerage nor a constant supply of pure water."

Whooping-cough proved fatal in 393 instances, against 614 in the corresponding quarter of the previous year. This decrease may in some measure be ascribed to the great mortality amongst children from scarlet fever.

In proportion to the population the mortality from whooping-cough was greatest in Connaught. Of the 97 deaths registered in the Ballyshannon Union, 15 resulted from this disease; and of the 191 deaths registered in the Sligo Union, 18 resulted from whooping-cough. In the Glengariff District of the Bantry Union there were registered 14 deaths, and of these 6 resulted from this disease; and in the Tullagh District, Skibbereen Union, 4 of the 14 deaths registered were caused by whooping-cough.

Fever was the cause of 672 deaths, against 671 in the corresponding quarter of the year 1873, and 718 in the third quarter of 1874. The deaths from fever were, in proportion to the population, pretty equally distributed throughout the provinces.

Small-pox numbered 162 deaths, against 135 in the preceding quarter, and 75 in the fourth quarter of 1873. Of the deaths from small-pox, 113 occurred in the province of Connaught, 47 in Ulster, 2 in Munster, and none in Leinster.

In the Swineford Union, 53 of the deaths from this disease took place. The Registrar of Kiltamagh District, in that union, states that 19 of the 46 deaths registered by him were caused by this disease, and further adds that the disease "is still making its ravages in the district, owing, in a great extent, to the practice of inoculation."

The Registrar of Tobercurry District reports:—"Small-pox of a bad nature is at present raging in my district. I have heard it rumoured that it was introduced here and propagated chiefly by inoculation, but cannot find any positive proof."

Of 49 deaths registered in the Balla District, Castlebar Union, no less than 23 resulted from small-pox. The Registrar states that inoculation has been carried on to "a fearful extent" in his district.

Some of the Registrars refer to the improved sanitary condition of their districts, and in several instances this improvement has been ascribed to the successful working of the new Sanitary Act; but that much remains to be done in the direction of sanitary improvement, the following extracts from notes of Registrars will amply show. Thus, the Registrar of Fanad District, Millford Union, says:—

"There are no sanitary arrangements carried out in this district. The generality of the houses of the small farmers and labourers in this district are overcrowded, dirty, and badly ventilated. Cattle are often kept in the same apartments in which the people sleep." The Registrar of Palmerston District, South Dublin Union, states:—"The Kilmainham township is in a very unsanitary condition. There are three palpable reasons why it should be so, viz.:—Insufficient surface drainage; inhabited houses unfit to live in; bad and insufficient ashpit and privy accommodation." The Registrar of Tallaght District, in the same union, considers "it is absolutely necessary that a proper sewer, with gratings, should be made the entire

Quarterly
Reports.Fourth
Quarter.

length of the village, which is constantly in a filthy state, and never will be otherwise until the above suggestion is carried out." The Registrar of Cootehill District, Cootehill Union, reports the prevalence of scarlatina in his district, and continues:—"On the 24th December I was called on to see a family, six in number; four were ill with scarlatina, crowded in a small room; in an adjoining room six cows were kept at night; the manure was a foot deep in the apartment occupied by the cattle (which is the better room of the two)." The Registrar of Ardmore District, Youghal Union, remarks:—"The sanitary state of this district is disgraceful. The principal well in the village, while in its present condition, is nothing more than a shallow hole in the ground into which all kinds of filth and dirt drain." The Registrar of Bruff District, Kilmallock Union, refers to the unsatisfactory sanitary condition of his district, and to the wretched houses of the labouring classes, and adds:—"I am at present attending a poor man for inflammation of the lungs, in one of those miserable abodes in which are crowded together six in family, a horse, and a pig, all in one room, capable of containing not more than about 700 cubic feet of air. Until something is done to improve the dwellings of the labouring classes, and to construct them on better hygienic principles, the progress of sanitary matters in this country will be slow indeed."

Inquests.—There were 723 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 31 of the total deaths registered. In Leinster there was 1 inquest to every 26 deaths registered; in Munster 1 to 27; in Ulster 1 to 37; and in Connaught 1 to 51.

Deaths in Public Institutions.—Of the 22,590 deaths registered during the quarter, 3,292, or 14.5 per cent., occurred in Public Institutions; in Leinster the per-centage was 18.6; in Munster 18.7; in Ulster 9.7; and in Connaught 10.7.

PRICES OF PROVISIONS, AND PAUPERISM.

During the whole of the fourth quarter of 1874 the price of Messrs. Manders and Co.'s 4-lb. loaf was 7d., being 1½d. cheaper than the average price in the corresponding quarter of 1873. In the fourth quarter of 1864 the average price was only 5½d.

The average price of oatmeal in Dublin for the quarter was 17s. per cwt., against 16s. 7d. for the corresponding quarter of 1873. In the fourth quarter of 1864 the average price was 10s. 10d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato market for the fourth quarter of 1874 were 2s. 7d. to 3s. 7d. In the fourth quarter of 1873 the average prices were 3s. 3d. to 4s. 9d., and in the corresponding quarter of 1864 they were 2s. 2d. to 3s. 4d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 53s. 6d. to 77s. 6d. per cwt., against 57s. 6d. to 77s. in the corresponding quarter of 1873, and 49s. 6d. to 65s. 6d. in the fourth quarter of 1864.

The following statement shows the average prices of the above-mentioned articles of food in Dublin during the fourth quarter of the years 1864-74:—

YEARS.	BREAD (Messrs. Manders & Co.'s 4-lb. loaf).	OATMEAL (Corn Exchange), per cwt.	POTATOES (at Potato Market), per cwt.		BEEF (at Dublin Cattle Market), per cwt.	
	s. d.	s. d.	s. d.	s. d.	s. d.	s. d.
1864 (4th quarter),	5½	10 10	2 2 to 3 4		49 6 to 65 6	
1865 "	7	15 1	2 9 to 3 8		50 6 to 63 6	
1866 "	7½	15 11	3 1 to 4 11		48 6 to 67 0	
1867 "	9	17 4	3 10 to 4 7		45 6 to 62 0	
1868 "	7½	16 4	2 11 to 4 7		49 6 to 65 0	
1869 "	6½	15 1	2 11 to 4 0		52 6 to 67 0	
1870 "	7	15 1	2 10 to 3 8		54 0 to 70 6	
1871 "	8	15 0	2 6 to 4 4		58 0 to 70 6	
1872 "	8	16 7	5 4 to 7 8		58 0 to 73 0	
1873 "	8½	16 7	3 3 to 4 9		57 6 to 77 0	
1874 "	7	17 0	2 7 to		53 6 to 77 6	

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1874 was 46,996, against 46,225 for the corresponding period of 1873.

The average weekly number of persons receiving out-door relief during the quarter was 28,439, against 28,211 for the fourth quarter of 1873.

Of the persons receiving in-door relief during the fourth quarter of 1874 an average number of 557 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1873 the average weekly number was 561.

*Quarterly
Reports.*

*Fourth
Quarter.*

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, during the fourth quarter of the year 1874 was 29·859 inches, against an average of 29·864 inches for the corresponding quarter of the preceding five years; the highest reading (30·426 inches) was on the 30th October, at 9.30 P.M., wind N.E.; and the lowest (28·595 inches) on the 11th December, at 9.30 A.M., wind W.

The mean temperature of the air during the quarter was 43·3°, against an average of 44·0° for the corresponding period of the preceding five years. The maximum temperature was 63·9°, and the minimum 23·5°.

Rain or snow fell on 51 days during the quarter. The rain-fall measured 9·003 inches, being considerably over the average. The greatest monthly rain-fall during the quarter was in November, when 3·235 inches were registered.

The wind blew on 38 days from W., on 17 days from S.W., on 10 days from N.W., on 6 days from E., on 5 days each from N.E., S.E., and S., on 4 days from N., and on 2 days the air was calm, at 9.30 A.M.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1874, inclusive:—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-4—By assuming the annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1874.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

[continued at page 112.]

CAUSES OF DEATH at different Periods of Life, in the Year 1874.

however, can now be made by means of the following Supplementary Tables, containing many of the deaths from distinct diseases, such as mumps, epistaxis, dry gangrene, polypus, rickets, bronchocele, &c., &c., and deaths from other forms of disease, such as softening of the brain (necrencephalus), which are returned in many cases under other heads, as paralysis, &c.

These Tables are an extension of the Tables of Causes of Death in Ireland, pp. 102-109.]

* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Counties Proper.

† According to the Census of 1871.

Topographical Description of the Eight Divisions into which Ireland has been divided in the foregoing Tables.

No. I., THE NORTH-EASTERN DIVISION.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II., THE NORTH-WESTERN DIVISION, is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., THE EASTERN DIVISION, is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenpoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., THE NORTH MIDLAND DIVISION, is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., THE SOUTH MIDLAND DIVISION, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., THE WESTERN DIVISION.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII., THE SOUTH-EASTERN DIVISION.—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

No. VIII., THE SOUTH-WESTERN DIVISION, extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

APPENDIX.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND,
from WILLIAM M. BURKE, Esq., F.C.P.I.

YEAR 1874.

SIR,

I beg to submit for your consideration some observations as to the causes of the deaths which were registered in Ireland during the year 1874.

"The General Abstract of the numbers of Marriages, Births and Deaths registered in Ireland" in the year 1874, (laid before Parliament in April, 1875,) contains in addition to the enumeration of the total deaths registered, a table showing the number of registered deaths which resulted from the eight principal zymotic diseases (small-pox, measles, scarlet fever, diphtheria, whooping-cough, fever, diarrhoea and cholera,) during the years 1864-74, with the average annual number in the ten years 1864-73; the annual mortality per 1,000 of the estimated population from all causes, and from the above-named diseases; and the ratio which the deaths from those diseases bear to the total deaths registered in each year.

By means of the table referred to, much valuable information was afforded long in anticipation of the "Detailed Annual Report," in the compilation of which much time and labour are required.

The total number of deaths registered during the year was 91,961, against 97,537 in the preceding year, showing a decrease in the mortality of 5,576.

The cause of death was not specified in 2,901 instances, showing an increase of 362 as compared with the year 1873. Of all the deaths registered, the cause was not specified or was ill-defined in 1 in every 31.7. This proportion varied from 1 in 17.7 in the Western Division to 1 in 68.4 in the North-Eastern Division.

Following the course which was adopted for the previous year, I now give Tables showing by Divisions the mortality from the principal diseases for the ten years 1864-73, the average for that period, and the deaths from those diseases in the year 1874 as contrasted with the average for the preceding ten years.

TABLE I.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class registered in Ireland during the Ten Years 1864-73; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the Number registered in 1874, and the Rate represented thereby.

I. ZYMOTIC DISEASES.

As stated in my last letter, the average annual number of deaths from zymotic diseases for the ten years 1864-73 was 16,850, affording an average annual rate of 304·80 per 100,000 of the estimated population. In the year under consideration the number of deaths from this class of diseases was 17,057, or 320·93 in 100,000 inhabitants, the rate varying from 412·34 in the Eastern and 398·85 in the North-Eastern to 256·88 in the North Midland and 235·77 in the North-Western Division.

Small-pox.—The average annual number of deaths from small-pox registered during the decade, 1864-73, was 602 (during the year 1872 this disease was epidemic and killed 3,248 persons); the number registered in the year 1874 was 569, nearly all of which occurred in the North-Eastern, North-Western and Western Divisions. The mortality from small-pox equalled 10·71 in every 100,000 of the inhabitants in the year 1874.

Measles.—The deaths from measles amounted to 667. The average annual number of deaths from this disease during the previous ten years was 1,019. In proportion to the population measles was most fatal in the Eastern, South Midland and North Midland Divisions.

Scarlet Fever.—To this pestilence no less than 4,034 persons fell victims; that is to say, 75·90 in every 100,000 of the inhabitants died from scarlet fever. In the Eastern Division the rate reached 152·04, and in the North-Eastern 134·12, while in the South-Western it only reached 32·87, and in the Western 21·95 per 100,000 inhabitants. The average annual number of deaths from scarlet fever during the previous ten years was 2,804, or 50·72 to every 100,000 of the estimated population.

Diphtheria.—This disease proved more fatal during the year 1874 than in any year, except 1864, since the Registration Act came into operation. The deaths registered in 1874 amounted to 565, against an annual average of 309 for the years 1864-73. As was the case with scarlet fever, the North-Eastern and Eastern Divisions suffered most, both numerically and in proportion to the estimated population.

Quinsy.—This disease caused 291 deaths, against 300 in the year preceding.

Croup.—The deaths from croup registered during the year numbered 1,799—972 males and 827 females. As in previous years, the South-Western and Western Divisions suffered most from this disease.

Whooping-cough.—2,029 deaths—879 males and 1,150 females—resulted from this disease. The average yearly number of deaths from whooping-cough for the previous ten years was 1,756. In the year 1874 the mortality from this disease was much greater in proportion to the population in the South-Eastern and South-Western than in any of the other divisions.

Fever.—The number of deaths from the three forms of fever amounted to 3,149; of these, 1,613 were of males and 1,536 of females. The average annual number for the preceding ten years was 3,798. The greatest number of deaths from fever in proportion to the population at each age-period occurred between the ages of 15 and 20 years, viz., 83·52 per 100,000 persons living at that age; next comes the period between the ages of 65 and 75, then 75 and upwards.

TABLE II.—Showing for the year 1874 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

Total,	404	352	756	448	462	910	761	722	1483	1,613	1,536	3,149	59·25

Of the deaths from fever registered, 756 were referred to typhus, 910 to typhoid or enteric fever, and 1,483 to "fever" or simple continued fever. The deaths from fever in 1874 represent a rate of 59·25 in every 100,000 inhabitants. The mortality from fever varied in the Registration Divisions of the country. Thus, in the Eastern Division the rate was 72·99 deaths to 100,000 of the population; in the South Midland 69·20, and in the South-Western 64·23; whereas in the North-Western it was 47·66, and in the North Midland 40·53.

Erysipelas.—The deaths from erysipelas, as registered, have varied very slightly from year to year as regards all Ireland. The average for the ten years 1864–73 was 291; in the year 1874 the deaths from this disease numbered 292, against 234 in the preceding year.

Metria or Puerperal Fever.—The number of women who died from child-bed fever was 333; the average annual number of deaths from this disease for the ten years 1864–73 was 309.

Influenza.—This disease proved fatal in 100 instances; a like number was registered in the year preceding. The average annual number of deaths from influenza in the years 1864–73 was 166.

Dysentery.—To this disease 294 deaths were attributed, being 4 less than in the preceding year, and 162 less than the annual average.

Diarrhœa.—1,671 deaths were ascribed to diarrhœa, against 2,095 in 1873, and 1,937, the average annual number for the years 1864–73.

Cholera.—The deaths from simple cholera amounted to 103, against 91 in 1873. One man died from glanders.

II. CONSTITUTIONAL DISEASES.

15,723 deaths from constitutional diseases (7,596 males and 8,127 females) were registered, against 17,152 in the previous year.

Phthisis or Pulmonary Consumption.—9,416 persons fell victims to this disease (4,522 males and 4,894 females), being 177·16 deaths in every 100,000 of the population.

TABLE III.—Showing, by DIVISIONS, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1864-73; the Average Annual Number for that period; and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1874, and the Rate represented thereby.

Rate per 100,000 Inhabitants,	Av. 1864-73,								182.73
	1874, .								17.716

The death rate from phthisis was highest in the North-Eastern Division, 250.64 in every 100,000 having died from this disease; in the Eastern the rate was 232.63; in the South-Eastern 172.89.

Mesenteric Disease.—The deaths from mesenteric disease or marasmus numbered 1,174—593 males and 581 females.

Hydrocephalus or Water on the Brain.—The deaths from this disease amounted to 1,015—574 males and 441 females.

Scrofula.—The deaths from this depraved state of the constitution amounted to 942—525 males and 417 females.

Gout.—From this disease but few die in Ireland; the number of deaths there, from registered during the year did not exceed 14—13 males and 1 female.

Cancer.—The deaths from cancer numbered 1,768—767 males and 1,001 females.

Dropsy.—Under the head of dropsy 1,206 deaths were tabulated.

III. LOCAL DISEASES.

29,403 deaths (16,244 males and 13,159 females) were referred to those diseases termed "local."

Diseases of the Nervous System.—8,248 deaths (4,631 males and 3,617 females) were referred to diseases of the nervous system, comprising 4,016 from convulsions, 1,441 from paralysis, 926 from apoplexy, 560 from cephalitis or inflammation of the brain, 330 from epilepsy, 190 from insanity, 5 from chorea or St. Vitus's dance, and 780 from brain disease unspecified.

Diseases of the Organs of Circulation.—The number of deaths from this order of diseases was 3,757—males 2,037 and females 1,720. In the year preceding, the deaths from diseases of the organs of circulation amounted to 4,236. The number of deaths from heart disease was 2,582—1,910 males and 1,672 females; 76 deaths

resulted from pericarditis or inflammation of the heart's covering, and 99 from aneurism.

*Diseases of the Respiratory Organs.**—The deaths registered from this group of diseases amounted to 11,419—6,151 males and 5,268 females—affording a death rate of 214·85 per 100,000 of the population, against an average annual death rate of 237·76, for the ten years 1864–73. The Eastern and South-Eastern Divisions (as was observed in the preceding year) suffered most in proportion to their population from diseases of the organs of respiration.

TABLE IV.—Showing, by DIVISIONS, the Number of Deaths from Diseases of the Respiratory Organs registered in Ireland during the Ten Years 1864–73; the Average Annual Number for that period, and the Average Annual Rate per 100,000 of the Estimated Population; with the number registered in 1874, and the Rate represented thereby.

The deaths from the foregoing order of diseases include 8,279 deaths from bronchitis—4,179 males and 4,100 females; 1,692 (1,145 males, 547 females) from pneumonia; 398 from asthma; 271 from pleurisy; 110 from laryngitis; and 669 from lung disease “unspecified.”

Diseases of the Digestive Organs.—To this group of diseases 4,237 deaths were ascribed; of these, 2,272 were males, and 1,965 females; 475 deaths were ascribed to enteritis or inflammation of the bowels—the sexes were 271 males, 204 females; peritonitis or inflammation of the covering of the bowels caused 307 deaths—137 males and 170 females; 396 deaths were ascribed to gastritis or inflammation of the stomach; 353 to ileus or obstruction of the bowels; 161 to ulceration of the intestines; 139 to hernia or rupture of the bowels; 51 to stricture of the intestines; 37 to intussusception; 7 (males) to fistula; 666 to stomach disease “unspecified;” 974 to liver disease “unspecified;” 237 to hepatitis or inflammation of the liver; 156 to jaundice; 17 to spleen disease; and 1 to disease of the pancreas.

Diseases of the Urinary Organs.—To the various affections of the urinary organs 1,255 deaths—939 males and 316 females—were referred. Of these, 320 resulted from nephria or Bright’s disease; 107 from diabetes; 98 from cystitis or inflamma-

* Phthisis or Pulmonary Consumption is not included in this group—see “Constitutional Diseases.”

tion of the bladder; 84 from nephritis or inflammation of the kidneys; 23 from ischuria or "suppression of the secretion of urine;" 19 from stone in the bladder; and 604 from kidney disease "unspecified."

Diseases of the Organs of Generation.—Under this heading 126 deaths are included. Five of these were of males; 1 was attributed to orchitis or inflammation of the testicle, 2 to hydrocele and 2 to pelvic abscess. Of the 121 deaths of females, 59 were the result of ovarian disease, and the remaining 62 were attributed to disease of the uterus.

Diseases of the Organs of Locomotion caused 166 deaths—111 males and 55 females—and *Diseases of the Integumentary System* 195; of these 78 were referred to ulcer, 6 to phlegmon and 111 to diseases of the skin.

IV. DEVELOPMENTAL DISEASES.

The number of deaths resulting from the development and decay of man amounted to 24,810—11,304 males and 13,506 females. To old age the deaths of 19,101 persons were ascribed—of these deaths 8,662 were males and 10,439 were females; 4,585 deaths were attributed to debility; 204 children—109 males and 95 females—died in consequence of being prematurely born; 264 children from teething, the sexes being equal—120 of the deaths from teething occurred in the North-Eastern Division; 7 deaths resulted from cyanosis; 16 from spina bifida; and 8 from "other malformations." The deaths resulting from the accidents of child-birth amounted to 602; the average annual number for the ten years 1864-73 was 628. If the deaths from metria registered during the year 1874 (333) be added to the deaths (602) from child-birth, we have a total of 935 of parturient women, or the death of one mother to every 151 of the births registered.

V. VIOLENT DEATHS.

TABLE V.—Showing, by DIVISIONS, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths) registered during the Ten Years 1864-73; the Average Annual Number for that period, and the Average Rate per 100,000 of the Estimated Population; with the number registered in 1874, and the Rate represented thereby.

	41.34	33.85	49.56	28.03	31.25	30.32	41.91	45.66	38.89

The number of deaths registered as having resulted from violence during the year 1874 was 2,067—1,371 males, 696 females—or 38·89 in every 100,000 of the estimated population. The average annual number of deaths from violence during the ten years 1864–73 was 2,144.

Of the violent deaths registered, 1,867 were accidental, 100 were homicidal, 99 were suicidal; 1 execution was registered during the year.

In 270 instances of sudden death the cause was not ascertained.

I am,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by
the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31st December, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank* Forms of Certificates of Marriage, which you will carefully take from the Certificate Book forwarded to you, and also with *six* of the printed Envelopes, addressed to "The Registrar of Births, Deaths, and Marriages."

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown*—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A *further supply* of Certificates *will be forwarded on your application*—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked* paper, with the words "Certificate of Marriage" printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,

Your obedient Servant,

WILLIAM DONNELLY,

Registrar-General.

To the

Registrar of Births, Deaths, and Marriages,

District of —————

*The Right Honorable Thomas O'Hagan, Attorney-General (now Lord O'Hagan); and James A. Lawson, Esq., Solicitor-General—now a Judge of the Common Pleas.

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the *Number* of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 163.*]
