DIAGRAM No. 1. Birth, Death and Marriage Rates, 1934 to 1948.

REPORT OF THE REGISTRAR GENERAL FOR THE YEAR 1948.

DO'N AIRE SLÁINTE.

Tá sé d'onóir agam a chur faoi do bhráid Tuarascáil ar Beireatasáí, Básanna agus Pósanna cláraithe sa bhliain, 1948.

P. Ó CINNÉIDE,

Ard-Chláraitheoir.

The term Ireland in this report excludes the six north-eastern counties and the term Northern Ireland relates to the six north-eastern counties.

In this Report births have been assigned to the districts containing the normal residence of the parents and deaths to the district containing the normal residence of the deceased. The number of births shown for each of the years 1943 to 1948 is exclusive of late registrations and the number of deaths for each of the years 1940 to 1948 is exclusive of non-residents.

GENERAL SUMMARY.

During the year 1948 the number of marriages recorded was 175 less than that in 1947; the number of births registered decreased by 3,048 and the number of deaths decreased by 7,704 when compared with the corresponding figures for the preceding year.

Marriages.—The marriages registered during the year 1948 numbered 16,115, compared with 16,290 for the previous year, and an annual average figure of 16,302 for the decennial period ended with 1947. The rate per 1,000 of the population for the year 1948 was 5·4 while the annual average rate for the period 1938 to 1947 was 5·5.

In Northern Ireland the rate per 1,000 for 1948 was 6·9; in England and Wales it was 9·0; and in Scotland 8·5.

Births.—The births registered during the year 1948 amounted to 65,930, a decrease of 3,048 when compared with the figure for the year 1947. The average annual number for the decennial period 1938 to 1947 was 62,605. The rate for 1948 was 22·0; for 1947 it was 23·2; and for the period 1938 to 1947 the average rate was 21·2.

The rate in Northern Ireland for 1948 was 21·9; in England and Wales it was 17·9; and in Scotland, 19·4.

The number of illegitimate births recorded was 2,165, equivalent to a rate of 3·3 per cent. of the total births, which was 0·1 below that for the year 1947. The corresponding percentage for 1948 in Northern Ireland was 3·6; and in Scotland, 5·8.

Deaths.—During the year 1948 the number of deaths registered was 36,357, a figure which is 7,704 less than the number for 1947 and 6,241 less than the average annual number for the years 1938 to 1947. The rate per 1,000 of the population for the year 1948 was 12·1 compared with 14·8 for 1947 and 14·4 for the decennial period ended with the year 1947. The rate for 1948 is the lowest recorded.

In Northern Ireland the death rate for 1948 was 11·2; in England and Wales it was 11·0 and in Scotland the rate was 11·8.

Of the deaths registered 26·4 per cent were stated to be due to heart disease, 11·2 to cancer, 8·5 to tuberculosis (all forms), 7·3 to intra-cranial lesions, 3·4 to pneumonia, and 2·7 to bronchitis.

There were 3,103 deaths from all forms of tuberculosis recorded during the year 1948. This figure is 597 less than that for 1947 and 616 less than the average number of deaths for the decennial period from 1938 to 1947. The figure for the year 1948 is the lowest yet recorded. The rate per 1,000 of the population for 1948 was 1·04; for 1947 the rate was 1·24, and for the decennial period 1938 to 1947 the rate was 1·26.

Deaths from cancer (all forms) numbered 4,074; this figure is 112 more than the figure for 1947 and 152 above the annual average number for the period from 1938 to 1947. The rate per 1,000 of the population for the year 1948 was 1·36, being 0·03 more than that for the preceding year.

During the year 1948 the number of deaths recorded as due to puerperal infection and diseases of pregnancy and childbirth was 104. This figure is equivalent to a rate of 1·58 per 1,000 births, compared with an average of 2·77 in the preceding ten years. The corresponding rate for urban areas for 1948 was 1·40 per 1,000 births, and for rural areas 1·68, as compared with 1·41 and 2·18, respectively, for the year 1947.

There were 3,313 deaths of infants under one year of age registered during the year. This figure is 1,374 less than that for the year 1947 and is equivalent to a rate of 50 per 1,000 births, compared with a rate of 68 for the preceding year. The rates per 1,000 births for urban and rural areas were 52 and 49 respectively in 1948, and 80 and 60 in 1947. The rate for 1948 is the lowest recorded.

The infant mortality rate in Northern Ireland was 46; in England and Wales it was 34 and in Scotland the rate was 45.

Among legitimate infants the rate of mortality was 47 per 1,000 births, and among illegitimate it was 149. The legitimate infant mortality rate for Northern Ireland was 44 and the illegitimate 92; for England and Wales it was 33 and 45; and for Scotland 43 and 71 respectively.

The number of deaths registered as caused by violence was 922. Included in this figure are 68 due to suicide, 18 to homicide, and 836 to accidental or unspecified violent causes. During the previous year there were 72 suicidal deaths, 9 homicidal deaths and 890 deaths due to other forms of violence. The number of accidental deaths registered during 1948 as attributable to road traffic was 195 compared with 167 for the previous year.

Issue of Authority for Registration.—Births and deaths which have not been registered within one year of their occurrence may only be registered on the authority of the Registrar-General. During 1948 authority was issued for the registration of 1,881 births and 230 deaths.

The actual number of births registered on the authority of the Registrar-General during the year was 1,680.

Searches and Certificates.—During the year 1948 the number of searches made in the records of marriages, births and deaths in respect of which fees were received was 59,712, the certificates issued numbered 51,683, and the amount of fees received was £11,052. In the year 1947 the corresponding figures were as follows:—searches, 52,228, certificates, 46,706, and fees £9,875.

TABLE A.—MARRIAGES, BIRTHS and DEATHS registered during each of the years 1938 to 1948, with the rates per 1,000 of the estimated population represented thereby, and similar particulars relating to Northern Ireland for the year 1948.

POPULATION.

It is estimated that the population at the middle of the year 1948 was 2,998,000. The number of males was estimated to be 1,516,000, and the number of females 1,482,000. These figures are based on the result of the Census of Population taken in 1946, the natural increase (excess of births over deaths), and the balance of the passenger movement (including emigration and immigration). The population in 1936, according to the report on the Census for that year, was 2,968,420—males 1,520,454, and females 1,447,966; according to the Register of Population taken in November, 1941, it was 2,992,034—of which 1,512,727 were males and 1,479,307 females; according to the Register of Population taken in December, 1943, it was 2,949,713—males, 1,489,585 and females, 1,460,128, and according to the Census of Population taken in May, 1946, it was 2,953,452, of which 1,494,384 were males and 1,459,068 females.

In Table I the estimated population for each of the years 1851 to 1948 is given.

TABLE B.—The average excess of births over deaths during the period 1864 to 1870, during each intercensal period between 1871 and 1936, and for each of the years 1936-1948, with the rate per 1,000 of the population, and the balance of the passenger movement from 1936 to 1948.

MARRIAGES.

Number and Rate.—There were 16,115 marriages registered during the year 1948 compared with a figure of 14,893 in 1938. The figure for 1948 is 175 less than that for the year 1947 and 187 less than the average for the decennial period 1938 to 1947.

The annual rate per 1,000 of the population for the year 1948 was 5.38 compared with 5.48 in 1947. The rate for the decennial period ended with 1947 was 5.51 per 1,000. In 1943, 1944, 1945 and 1946, the rates were respectively 5.88, 5.70, 5.86 and 5.91 per 1,000. The figures and rates for each of the years 1938 to 1948 are shown in Table C on page x, and a summary of the figures and rates since 1864 is given in Tables 3 and 4 of Part II of this Report.

The following table shows the marriage-rate for Ireland, Northern Ireland, England and Wales, and Scotland for each of the years 1939 to 1948:—

YEARS	Ireland	Northern Ireland	England and Wales	Scotland
1939 ...	5.2	7.1	10.6	9.2
1940 ...	5.1	7.6	11.3	10.7
1941 ...	5.0	9.3	9.4	9.5
1942 ...	5.9	9.0	8.9	9.5
1943 ...	5.9	7.8	7.2	7.6
1944 ...	5.7	7.2	7.1	7.2
1945 ...	5.9	7.9	9.3	9.5
1946 ...	5.9	7.4	9.0	8.9
1947 ...	5.5	7.1	9.3	8.6
1948 ...	5.4	6.9	9.0	8.5

MARRIAGES—continued.

In Abstract II, Part III, the number of marriages recorded for each county is shown together with information regarding the mode of celebration, the number for each quarter, the conjugal condition of the parties married, and the number of persons married who were not of full age at the time of marriage.

Mode of Celebration.—The number of marriages celebrated in accordance with the rites and ceremonies of the Catholic Church during the year 1948 amounted to 15,293 (equal to 94.9 per cent. of the total), and other marriages numbered 822. The number of Catholic marriages is 86 less than that for 1947 and the number of all other marriages is 89 less than the figure for the preceding year. In the year 1948 the number of marriages other than Catholic recorded include 559 according to the rites and ceremonies of the Protestant Episcopal Church; 127 in Presbyterian meeting-houses; 68 in registered buildings belonging to various other religious denominations; 50 by civil contract in the registrars' offices; 2 according to the usage of the Society of Friends, and 16 according to Jewish rites. Comparing these figures with those for 1947, the number according to the rites and ceremonies of the Protestant Episcopal Church shows a decrease of 64; in Presbyterian meeting-houses a decrease of 33; in registered buildings an increase of 10; in the registrars' offices a decrease of 4; a decrease of 4 according to the usages of the Society of Friends; and an increase of 6 according to Jewish rites.

At the Census of 1936, Catholics represented 93.4 per cent. of the population, Protestant Episcopalians 4.9 per cent., Presbyterians 1.0, Methodists 0.3, and all other denominations 0.4.

The number of Catholic marriages recorded during 1948 is equal to a rate of 5.46 per 1,000 of the estimated Catholic population, a rate which is 0.08 below the average rate for the preceding ten years, and the rate for all other marriages was 4.15 per 1,000 of all persons other than Catholics in the population, or 0.57 below the average. Corresponding rates for each year from 1938 to 1948 are shown in Table C below.

TABLE C.—MARRIAGES registered in 1948 and in each of the previous ten years, according to the MODES OF CELEBRATION ; with the rate per 1,000 of the population represented by Catholic and all other marriages.

YEARS	Marriages registered other than Catholic							Catholic Marriages	Total Marriages Registered	Rate per 1,000 of estimated corresponding Population represented by		
	Protestant Episcop- al- ian	Presby- terian	In Regis- tered Build- ings	In the Regis- trars' Offices	Society of Friends	Jews	Total			Catholic Marriages	All other Marriages	Total Marriages

1947 ...	623	160	58	54	6	10	911	15,379	16,290	5.18	4.64	5.48
Yearly Average 1938-47	663	139	56	52	3	8	921	15,381	16,302	5.54	4.72	5.51
1948 ...	559	127	68	50	2	16	822	15,293	16,115	5.46	4.15	5.38

Conjugal Condition.—The figures show that marriages between bachelors and spinsters constitute 94.9 per cent. of the total marriages; those of widowers and spinsters, 3.3 per cent.; bachelors and widows, 1.1 per cent.; and those of widowers and widows, 0.7 per cent. Of the men married, 4.0 per cent, were widowers, and of the women, 1.8 per cent. were widows, or in 58 instances in every 1,000 marriages, one or both of the contracting parties had been married before. The corresponding figures for 1947 were the same. In Table E similar figures from the year 1938 are shown.

MARRIAGES—continued.

TABLE D.—MARRIAGE RATES (per 1,000 of the population) for counties, county boroughs and provinces, for the year 1948, together with comparative figures for the periods 1925 to 1927 and 1935 to 1937, inclusive.

Counties, &c.	Marriages per 1,000 of Population			Counties, &c.	Marriages per 1,000 of Population		
	Annual Average 1925-7	Annual Average 1935-7	Year 1948		Annual Average 1925-7	Annual Average 1935-7	Year 1948

Cork Co. Borough	8.2	8.7	9.8	Ulster (part of)	3.9	4.4	4.7

Rates for Counties, etc.—In making a comparison of the marriage rates for each of the counties and county boroughs, it must be borne in mind that the rates are based on the total number of marriages recorded in each area irrespective of the fact that the persons married may not be residents of the area in which the marriage took place. An examination of the returns of marriages proves that many persons living in the rural portions of the country are married in the county boroughs and urban areas. This fact accounts in some measure for the high rates for the county boroughs. In Limerick county borough the rate was 10.1 per 1,000; in Cork 9.8; in Dublin 8.1; and in Waterford 6.2. The highest rates for the remaining areas were Louth 7.0, Westmeath 6.1, Dublin 5.7, and Wicklow 5.3. The lowest rates were recorded in Laoighis 3.6, Clare, Limerick and Roscommon 3.8 each, and Mayo 4.0 per 1,000.

In the provinces the rates were 6.4 for Leinster, 5.1 for Munster, 4.7 for Ulster (part of), and 4.2 for Connaught. The corresponding rates for 1947 were 6.1 for Leinster; 5.4 for Munster; 5.3 for Ulster (part of); and 4.5 for Connaught. The rate for Leinster for 1948 is 0.6 per 1,000 above the average figure for the three years 1935 to 1937, that for Munster is 0.6 more than the average, in Connaught the increase was 0.3 and in Ulster (part of) it was 0.3 per 1,000 of the population.

Marriages in each Quarter.—The number of marriages is shown in Table 5 by quarters for each of the years 1938-1948, and also the average number and rate for the ten years 1938 to 1947, and the rate for the year 1948. In the first quarter of 1948 the rate per 1,000 of the population was 4.8, in the second 5.3, in the third 6.7, and in the fourth 4.7. The corresponding rates for the year 1947 were 5.1 for the first quarter, 5.4 for the second, 6.6 for the third, and 4.8 for the fourth quarter; and the average rates for the decennial period from 1938 to 1947 were 5.1, 5.1, 6.0 and 4.7 respectively.

In the same Table the number of Catholic marriages and marriages other than Catholic recorded for each quarter of the year 1948 is given, and the equivalent rate per 1,000 of the population, together with the average figures and rates for the decennial period from 1938 to 1947.

In the case of Catholic marriages the rate per 1,000 of the corresponding population for each of the first and following quarters of 1948 was 4.9, 5.4, 6.7 and 4.9 respectively, compared with a rate of 5.2, 5.4, 6.6 and 4.9 for the same quarter of the year 1947. The rate for other marriages for each of the quarters of the year 1948 was 2.9, 4.6, 6.3 and 2.8 respectively, and the rate for the corresponding quarter of the previous year was 3.3, 5.1, 6.6 and 4.9 per 1,000 of the population other than Catholic.

MARRIAGES—continued.

TABLE E.—Proportion of PERSONS MARRIED NOT OF FULL AGE, and of RE-MARRIAGES during the years 1938 to 1948.

YEAR	Total Marriages	Persons not of Full Age		Re-Marriages	
		of 100 Men Married	of 100 Women Married	Widowers	Widows
				of 100 Men Married	of 100 Women Married
1938	14,893	1.36	7.22	5.20	2.19
1939	15,204	1.47	7.39	4.84	1.82
1940	15,212	1.70	8.20	4.65	1.85
1941	15,021	1.84	7.96	4.27	1.90
1942	17,470	1.99	8.51	4.12	1.65
1943	17,328	1.56	7.48	3.85	1.72
1944	16,772	2.07	8.49	3.98	1.78
1945	17,301	1.51	7.69	3.24	1.64
1946	17,525	1.13	6.39	3.10	1.62
1947	16,290	1.50	7.03	4.04	1.82
1948	16,115	1.97	8.51	3.95	1.83

Age at Marriage.—The Schedules to the Acts relating to marriage indicate that the law does not require that the ages of the contracting parties should be entered in the register or certificate. It is necessary that each party should be described as “of full age” or “minor” as the case may be, with the result that a complete record of the ages of the persons married is not available.

In the Province of Leinster the proportion of husbands in 1948 who were stated to have married under age was 2.56 per cent.; in Munster 1.48; in Connaught 1.06, and in Ulster (part of) 1.38 per cent. In the case of females married the proportion who were minors in Leinster was 10.15, in Munster 7.19, in Connaught 5.35, and in Ulster (part of) 8.05 per cent. The corresponding percentages for the country as a whole were 1.97 for husbands and 8.51 for wives.

The proportion per cent. of males married in Northern Ireland in 1948 who were under age was 4.3 and of females 18.2.

Licences for Marriage.—During the year 1948, the number of licences issued by the registrars for marriages in registered buildings and in registrars' offices was 97. On 31st December, 1948, the number of such registrars of marriages authorised to grant licences for marriage was 67.

Marriage licences issued by licensing officers of the Protestant Episcopal Church amounted to 518. The number of licensing officers on the 31st December, 1948, was 142.

The number of licences for marriages issued by the licensing ministers of the Presbyterian bodies during the year 1947 was 114. The number of licensing ministers on the 31st December, 1948, was 50, of whom 46 were of the General Assembly, 2 of the United Presbytery or Synod of Munster, and 2 of the Western Presbytery, Reformed Presbyterian Church.

Buildings in which Marriages may be solemnised.—The law does not require the Registrar General to keep a register of the churches and chapels of the Catholic Church in which marriages may be solemnised. In the case of the other religious denominations the records in this office show that 1,036 churches and chapels of the Protestant Episcopal Church were, on the 31st December, 1948, licensed for the solemnisation of marriages, 143 Presbyterian meeting-houses (141 General Assembly, 2 United Presbytery or Synod of Munster), and 163 separate buildings belonging to various other religious denominations were registered for the solemnisation of marriages. The several religious bodies to whom the 163 separate buildings belong are shown in the following list:—

Denominations	No. of Places of Worship	Denominations	No. of Places of Worship
Methodists	126	Salvation Army	2
Reformed Presbyterians ...	5	Seceders	2
Baptists	8	“Undenominational” ...	6
Independents or Congregationalists	4		
Christian Brethren	9		
Moravians or United Brethren	1		
		TOTAL	163

BIRTHS.

The births for the year 1948 numbered 65,930, a figure which is 3,048 less than that for the year 1947 and 3,325 more than the average number recorded during the decennial period from 1938 to 1947. The numbers recorded for each of the years 1943 to 1947 were 64,375, 65,425, 66,861, 67,922, and 68,978 respectively.

The annual rate per 1,000 of the population represented by the number of births recorded during the year 1948 was 22·00 and in 1947 the corresponding rate was 23·21 per 1,000. In the years 1943, 1944, 1945 and 1946, the rates were 21·85, 22·22, 22·65 and 22·92 respectively.

In Tables 3 and 4 the number of births and the average rate per 1,000 of the population represented thereby for the period 1864 (in which year the act for the registration of births became operative) to 1870, for each decennial period from 1871 to 1940, and the rate for each year since 1938 are shown. In the period from 1864 to 1870 the average rate was 25·79 per 1,000 and in the period from 1871 to 1880 it was 26·31, falling gradually to 19·34 for the decennial period 1931 to 1940. During the period 1939 to 1948 the highest rate recorded was 23·21 for 1947 and the lowest 18·97 for the year 1941.

The following table shows the birth-rate for Ireland, Northern Ireland, England and Wales, and Scotland for each of the years 1939 to 1948 :—

YEARS	Ireland	Northern Ireland	England and Wales	Scotland
1939 ...	19·1	19·5	14·9	17·4
1940 ...	19·1	19·6	14·6	17·1
1941 ...	19·0	20·8	14·2	17·9
1942 ...	22·3	22·8	15·8	18·1
1943 ...	21·9	24·2	16·5	18·9
1944 ...	22·2	23·5	17·6	18·5
1945 ...	22·7	22·0	16·0	16·9
1946 ...	22·9	22·6	19·1	20·3
1947 ...	23·2	23·3	20·6	22·0
1948 ...	22·0	21·9	17·9	19·4

Rates for Counties, etc.—In Abstract I, Part III, the number of births for each province, county and county borough for the year 1948 is given. The birth rates for the provinces, counties, county boroughs and urban and rural areas are given in Tables 10 and 12. For the province of Leinster the rate was 24·1, for Munster 21·6, for Connaught 20·0 and for Ulster (part of) 20·4, as compared with 25·1, 22·7, 20·9 and 21·4 respectively, for 1947. Comparing the rates for the years 1947 and 1948, it will be seen that the rate for Leinster has decreased by 1·0, for Munster by 1·1, for Connaught by 0·9 and for Ulster by 1·0.

In Table 10 it appears that the following rates were recorded in the county borough areas, viz., Dublin 25·3, Cork 25·6, Limerick, 27·9 and Waterford 23·9 per 1,000. The highest rates in the counties were Kildare 27·3, Wicklow 24·7, Louth 24·6 and Carlow 24·0. On the other hand, the lowest rates recorded were Roscommon 16·7, Leitrim 17·5, Kerry 19·6, Cavan 19·7, Laoighis 19·8, and Cork, Mayo and Monaghan each 19·9.

The birth rates for the total urban areas were 24·7 and 25·9 respectively, in the years 1948 and 1947, a decrease of 1·2 per 1,000, while the corresponding rural rates were 21·1 and 22·0, respectively, a decrease of 0·9 per 1,000. In Table 15 the birth rates for the urban and rural areas are shown for a number of years.

Illegitimate Births.—The births registered during 1948 include 2,165 of illegitimate children, a figure which is 183 below that for 1947. The number for 1948 is equivalent to a rate of 0·7 per 1,000 of the population, and a rate of 3·3 per cent. of the total births recorded. The respective rates for the previous year were 0·8 per 1,000 and 3·4 per cent.

In Northern Ireland for 1948 the rate per cent. of the total births was 3·6, and for Scotland 5·8.

The percentages are shown for each of the provinces for the years 1941 to 1948 in the following statement :—

AREA	Illegitimate births—per cent. of total births.							
	1941	1942	1943	1944	1945	1946	1947	1948
Ireland	3·48	3·66	3·80	3·92	3·93	3·89	3·40	3·28
Leinster ...	3·62	3·77	4·00	4·15	4·17	3·97	3·75	3·41
Munster ...	3·59	3·80	4·16	4·01	4·13	4·21	3·58	3·69
Connaught ...	2·32	2·53	2·29	2·44	2·39	2·64	1·64	1·71
Ulster (part of) ...	4·43	4·59	4·19	5·04	4·65	4·46	3·62	3·98

BIRTHS—continued.

In Tables 9 and 10 the number of illegitimate births and the proportion per cent. of the total births registered for each of the provinces, counties and county boroughs for the year 1948 are given. The highest percentages were in the following counties: Waterford 7·1, Limerick 5·9, Wexford and Tipperary N.R. each 5·4, Longford 5·3, Wicklow 5·2, and Carlow 5·0. The counties with the lowest ratios were Mayo 1·3, Limerick county borough 1·7, Galway and Leitrim each 1·8, and Waterford county borough 1·9 per cent.

Legitimacy Act (1931).—The authority of the Registrar-General for the re-registration of births under the Legitimacy Act, 1931, was issued in 107 cases during the year 1948. This figure is 10 less than the corresponding figure for the year 1947.

Proportion of Males to Females.—The number of male births registered in 1948 was 33,993 and of female births 31,937. The proportion between the sexes was 1,064 males per 1,000 females, a ratio which is 7 below that for 1947 and which is 4 above the average figure for the years 1938 to 1947. In Northern Ireland for the year 1948 the proportion of males born alive to 1,000 females was 1,070, and in Scotland 1,070.

Table 4 shows the proportion of male to female births for each of the years since 1938, and also the average rates since the year 1864.

The male children born in wedlock in 1948 numbered 32,871, and the female 30,894, or 1,064 males to every 1,000 females, and of the illegitimate children, 1,122 were males and 1,043 females, or 1,076 boys to every 1,000 girls.

Births in each Quarter.—The number of births by sexes recorded during each quarter of 1948 is shown in the following table:—

	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter	Total
Males ...	8,428	9,258	8,485	7,822	33,993
Females ...	7,882	8,885	7,900	7,270	31,937
TOTAL ...	16,310	18,143	16,385	15,092	65,930

In Table 5 the number of births registered in each quarter of the years 1938 to 1948 is given, together with the rates for the year 1948 and the average rates for the previous decennial period. The rates for each of the quarters were 21·8, 24·2, 21·9, 20·1 per 1,000, showing increases of respectively 0·9, 1·6, 0·2 and 0·6 compared with the average rates.

Multiple Births.—The number of infants born alive in multiple births registered during 1948 was 1,686, consisting of 831 pairs of twins, and 8 sets of triplets, as compared with 1,949 (961 pairs of twins and 9 sets of triplets) for the previous year. The twin children whose births were recorded during 1948 were 2·5 per cent. of the total number of infants whose births were registered. In 1947 the corresponding percentage was 2·8.

The number of mothers of living children whose births were recorded during the year was 65,083. Of these 64,244, or 98·7 per cent., gave birth to single infants, and 839 or 1·3 per cent. to two or more infants at a birth.

The infants born in wedlock (63,765) included 62,123 single infants, 1,618 twins and 24 triplets, equivalent to, respectively, the ratios of 97·42 per cent., 2·54 per cent., and 0·04 per cent. of the total number of legitimate births.

Illegitimate infants included 2,121 single infants, and 44 twin infants, equivalent, respectively, to 97·97 per cent. and 2·03 per cent. of the 2,165 illegitimate infants registered. In the year 1947 the illegitimate infants recorded included 2,293 single infants, 52 twin infants and 3 triplet infants.

In the year 1948 the infants born alive in multiple births comprised 831 males and 855 females. Of the twin infants, 826 were males and 836 females, the triplet infants included 5 males and 19 females.

It should be noted that the figures given above relate to live births, as stillbirths are not registered, and that, therefore, the birth of one living child and one stillborn, or one living child and two stillborn, is counted as a single birth, and the birth of two living children and one stillborn is counted as a twin birth.

DEATHS.

Number and Rate.—The number of deaths recorded during the year 1948 was 36,357, the males numbering 19,117 and the females 17,240. The total is 7,704 less than the number for 1947 and 6,241 less than the average for the decennial period 1938 to 1947. In the year 1948 the deaths of males were 4,344 less, and the deaths of females, 3,360 less than in the previous year.

The deaths registered in 1948 represent a rate of 12·13 per 1,000 of the population, compared with 14·83 for 1947 and an average of 14·41 for the ten years 1938 to 1947. The rate for males during each of the past three years was 14·59, 15·61 and 12·61, the corresponding ratio for females being 13·39, 14·02 and 11·64 respectively.

A comparison of the death rates since 1864 is shown in Table 4, and in Table 8 the rates by sexes and ages for the same periods are given.

The death rates per 1,000 of the population for Ireland, Northern Ireland, England and Wales, and Scotland for the years 1939 to 1948 are as follows:—

YEARS		Ireland	Northern Ireland	England and Wales	Scotland
1939	...	14·2	13·5	12·1	12·9
1940	...	14·2	14·6	14·0	14·9
1941	...	14·6	15·2	12·9	14·5
1942	...	14·1	13·3	11·6	13·0
1943	...	14·8	13·4	12·1	13·3
1944	...	15·3	12·8	12·7	13·6
1945	...	14·5	12·3	11·4	13·2
1946	...	14·0	12·5	11·5	13·1
1947	...	14·8	12·6	12·0	12·9
1948	...	12·1	11·2	11·0	11·8

Rates for Counties, etc.—In Abstract I, Part III, the number of deaths recorded for each province, county and county borough is shown. In Tables 10 and 12 death rates are given for each of the provinces, counties and county boroughs and also for urban and rural areas. The rates for the county boroughs were as follows:—Dublin 10·8, Cork 13·4, Limerick 12·1, and Waterford 13·2. The counties with the highest rates were Sligo 14·2, Wexford 13·6, Tipperary S.R., 13·5, Waterford Co. 13·5, Mayo 13·1, Westmeath 13·0, and Donegal 13·0. The lowest rates were recorded for Dublin Co. 11·2, Kildare 11·5, Galway, 11·8, Limerick Co. 11·9, Longford and Kerry each 12·0, Wicklow Leitrim and Monaghan each 12·2, per 1,000.

The lowest rate recorded for any of the counties or county boroughs was that for Dublin county borough.

The rate for the province of Leinster was 11·9 per 1,000, for Munster 12·6, for Connaught 12·7 and for Ulster (part of) 12·8, compared with 14·5, 15·4, 15·0 and 15·0 for the preceding year.

During the year 1948 the rates represented by the deaths recorded for the aggregate urban and rural areas were respectively 11·6 and 12·7 per 1,000 compared with 14·3 and 15·2 for the preceding year. The figure for the urban areas in 1948 is 2·7 below, and that for the rural areas 2·5 below the respective rates for the year 1947. A comparative statement of the rates for these areas for a series of years is given in Table 15.

Deaths in each Quarter.—The following statement shows the number of deaths of persons and of males and females registered during each quarter of the year 1948:—

		1st Quarter	2nd Quarter	3rd Quarter	4th Quarter	Total
Males	...	5,523	4,912	4,232	4,450	19,117
Females	...	5,089	4,421	3,633	4,097	17,240
TOTAL	...	10,612	9,333	7,865	8,547	36,357

DEATHS—continued.

Of the total deaths, 19,945, or 54.9 per cent., were registered during the first six months and 16,412, or 45.1 per cent., in the second six months. The corresponding percentages for the preceding year were respectively 61.6 and 38.4.

During the year 1948 the mortality was highest in the first quarter, in which the rate was 14.2 per 1,000 of the population. In the second quarter the rate was 12.5, in the third 10.5, and in the last quarter it was 11.4. In the preceding year the rates for the quarters were as follows :—first 21.5, second 15.0, third 11.2, and fourth 11.6.

The rate for each quarter of 1948 and the average figure for the previous ten years are given in Table 5. A comparison between the rates for 1948 and the average figure shows that in the first quarter there was a decrease of 4.1 per 1,000; the rate for the second quarter shows a decrease of 2.0; the third a decrease of 1.2, and in the fourth quarter there was a decrease of 1.8 per 1,000.

Deaths in Institutions.—In Abstract V information is given relating to deaths in institutions for the country as a whole, and for each province, county and county borough. Deaths occurring in general and special hospitals numbered 4,521, in mental hospitals 989, in county homes and hospitals, etc., 7,077; and 23,770 occurred elsewhere, chiefly at the homes of the deceased. These figures are in the respective proportions of 12.4, 2.7, 19.5 and 65.4 per cent. of the total number of deaths.

These rates, when compared with the figures for earlier years, indicate an increasing tendency to avail of hospital and institutional treatment. In 1938 the percentages of deaths in the three classes of institutions were 11.9, 2.8 and 18.6, respectively, 66.7 per cent. dying at their own homes.

Uncertified Causes.—The number of cases in which the cause of death was not stated to have been certified by a medical practitioner or coroner was 4,055. This figure is equivalent to a rate of 11.2 per cent. of the total deaths registered during the year. The proportion for the previous year was 12.5 and the average percentage for the ten years from 1938 to 1947 was 14.3.

The majority of the uncertified deaths are recorded in rural district, the percentage for these districts in 1948 being 15.6. In the urban areas the percentage was only 1.7.

Inquests.—The number of deaths registered on certificates issued by coroners as the result of inquests or post-mortem examinations during the year 1948 was 1,237, or one in every 29 deaths registered. The number of such deaths for the year 1948 include 814 cases in which inquests were held, and 423 cases in which the death was registered on a certificate issued as the result of a post-mortem examination.

CAUSES OF DEATH.

The causes of the deaths of males and females registered during the year 1948 classified in accordance with the list adopted at the International Conference held in Paris in 1938, are published in Abstract IV. In Abstract V the causes of the deaths by age periods for each of the provinces, counties and county boroughs are shown, and in Abstract VI the causes of the deaths for each of the principal towns are given.

The proportion of the deaths from the principal causes at certain age-periods is given in Table F on the following page. It will be seen that heart disease is the cause of the largest proportion of deaths, namely, 264 in every 1,000 deaths; the next in order are senility 132, cancer 112, tuberculosis (all forms) 85, intra-cranial lesions of vascular origin (cerebral hæmorrhage, etc.), 73, pneumonia 34, and bronchitis 27 in every 1,000 deaths. These causes account for 73 per cent. of the total mortality.

Among deaths of infants under one year the group of diseases and conditions under the heading of congenital malformations and diseases peculiar to the first year of life (including congenital debility and premature birth) accounts for 553 in every 1,000 deaths compared with 518 in every 1,000 deaths for the preceding year. Among the other principal causes of death at this age-period are pneumonia (128), diarrhoea and enteritis (100 in every 1,000), whooping cough (41 in every 1,000 deaths) and bronchitis (24 in every 1,000 deaths).

In the case of children between the ages of one and five years, tuberculosis is the cause of 168 in every 1,000 deaths, pneumonia in 156 instances, whooping cough in 78, diarrhoea and enteritis in 39, measles in 30, bronchitis in 23, and diphtheria in 22 cases. The chief feature of the mortality of children aged 5 and under 15 years of age is the proportion due to tuberculosis (295 in every 1,000), pneumonia 55, and diphtheria 14 in every 1,000. The chief cause

TABLE F.—Proportion of deaths from the principal causes at certain age-periods in 1948.

CAUSES OF DEATH—continued.

of the deaths of persons aged 15 and under 45 years is tuberculosis, and subsequent to that age the chief factors in the mortality are heart disease, cancer and intracranial lesions.

A comparative statement of the deaths from the principal causes recorded for each of the years 1946, 1947 and 1948 is given below, and in Table 7 the rates per 100,000 of the population are published.

CAUSES	Number of Deaths Registered			CAUSES	Number of Deaths Registered		
	Years				Years		
	1946	1947	1948		1946	1947	1948
Typhoid Fever ...	26	15	15	Heart Disease ...	10,120	11,118	9,564
Cerebro-Spinal Men- ingitis ...	25	38	34	Bronchitis ...	1,223	1,318	999

Intra-Cranial Lesions of vascular origin	2,716	3,024	2,656				

In Table 10 the rates per 1,000 of the population represented by the deaths from the principal epidemic diseases* are given by provinces, counties and county boroughs. The rate for Ireland was 0·2 compared with 0·4 for the previous year. The rates for the county boroughs are as follows :—Dublin 0·2, Cork 0·3, Limerick and Waterford each 0·6 per 1,000. The highest county rates are :—Kilkenny and Wicklow each 0·4, and Kildare, Meath, Wexford, Kerry, Limerick and Galway each 0·3. The counties in which the rates were lowest are :—Carlow, Laoighis, Mayo, Roscommon, Sligo and Cavan each 0·1 per 1,000.

It may be seen in Table 12 that the mortality from this group of causes for all urban areas (county boroughs and urban districts) was equal to a rate of 0·3 per 1,000 of the population, compared with 0·2 for the rural districts. The corresponding rates for 1947 were 0·7 and 0·3 respectively.

Typhoid and Paratyphoid Fevers.—The number of deaths recorded was 15, including 12 of males and 3 of females. The corresponding figure for 1947 was also 15, including 11 of males and 4 of females. The average number for the decennial period from 1938 to 1947 was 41. During 1948 there were 9 deaths for urban areas and 6 for rural areas.

Scarlet Fever.—There were 5 deaths from this disease registered during the year 1948 compared with 8 in the previous year. The average figure for the ten years 1938 to 1947 was 28.

Whooping Cough.—The number of deaths recorded under this heading was 204, compared with 298 for the year 1947, and an average figure of 200 for the decennial period ended with the latter year. The total for 1948 includes 103 of males and 101 of females, compared with 137 and 161, respectively, in the previous year.

The figure for 1948 includes 137 of infants under one year of age and 36 of children aged between one and two years. In 1947 the corresponding figures were 205 and 55.

There were 24 deaths recorded for Galway, 19 each for Cork (exclusive of the county borough) and Donegal, 16 for Dublin county borough, 13 for Kilkenny, and 12 for Wicklow.

Diphtheria.—The number of deaths was 30, compared with a figure of 56 for 1947, and an average of 220 for the years 1938 to 1947. In 1933 the number was 418 (the highest recorded since 1921), and the respective figures for each of the years 1938 to 1946 were 314, 245, 178, 165, 267, 310, 293, 236 and 139.

The figures for 1948 includes 8 males and 22 females, the corresponding figures for the previous year being 26 and 30 respectively.

* Typhoid fever, scarlet fever, whooping cough, diphtheria, dysentery, smallpox, measles, typhus and diarrhoea and enteritis (under 2 years).

DIAGRAM No. 2. Mortality from Diphtheria, 1934 to 1948.

CAUSES OF DEATH—continued.

Diphtheria—continued.

Included in the figure for 1948 were 17 of children aged between one and five years and 7 between the ages of five and ten years.

The death rate per 100,000 of the population was 1·0 compared with 1·9 for the previous year. In the urban areas as a whole the rate for 1948 was 0·5 compared with 1·5 in the previous year, and in the rural areas the corresponding rates were 1·3 and 2·1 per 100,000 of the population.

For Leinster the rates for 1948 and 1947 were 0·8 and 2·0, for Munster 1·3 and 2·1, for Connaught 1·2 and 0·4, and for Ulster (part of) 0·8 and 3·8 per 100,000.

The following table shows the death rate per 100,000 of the population for Ireland and the urban and rural areas for each of the years 1939 to 1948 :—

YEARS	Ireland	URBAN DISTRICTS			Rural Districts
		Principal Towns	Other Urban Districts	Total	
1939 ...	8·3	14·1	11·7	13·6	5·7
1940 ...	6·0	9·9	6·4	9·1	4·5
1941 ...	5·5	9·0	4·9	8·4	4·2
1942 ...	9·0	13·8	5·4	12·3	7·4
1943 ...	10·5	15·7	8·8	14·3	8·4
1944 ...	10·0	13·2	12·0	13·0	8·4
1945 ...	8·0	7·6	9·9	8·1	8·0
1946 ...	4·7	4·3	3·1	4·1	5·1
1947 ...	1·9	1·3	2·1	1·5	2·1
1948 ...	1·0	0·2	1·6	0·5	1·3

The counties and county boroughs in which the highest death rates from this disease were recorded in 1948 are as follows :—Westmeath 3·6, Tipperary N.R. 3·4, Kildare 3·1, and Galway 3·0 per 100,000 of the population. There were no deaths recorded for Carlow, Kilkenny, Laoighis, Offaly, Wicklow, Cork county borough, Limerick county borough, Waterford county borough, Mayo, Roscommon, Sligo, Cavan and Monaghan, and the lowest death rates for the remaining counties were :—Dublin county borough 0·2, Dublin 0·8, Limerick 1·0, Wexford 1·1, Cork 1·1, Tipperary S.R. 1·3, and Louth, Meath, Donegal and Kerry each 1·5 per 100,000.

Tuberculosis.—The number of deaths registered during 1948 from all forms of tuberculosis was 3,103—1,639 of males and 1,464 of females. When compared with the number recorded in 1947 the total shows a decrease of 597—in the case of males of 265 and in the case of females of 332. The figure for 1948 is 616 below the average for the decennial period from 1938 to 1947—a decrease in male deaths of 282 and 334 in the case of female deaths.

The deaths recorded during 1948 are equivalent to a rate of 1·04 per 1,000 of the estimated population. For 1947 the rate was 1·24 per 1,000, and during the ten years from 1938 to 1947 the average rate was 1·26 per 1,000.

In the following table the mortality from tuberculosis per 1,000 of the population for Ireland, Northern Ireland, England and Wales, and Scotland is given for each of the years 1939 to 1948 :—

YEARS	Ireland	Northern Ireland	England and Wales	Scotland
1939 ...	1·13	0·84	0·63	0·70
1940 ...	1·25	0·98	0·70	0·82
1941 ...	1·24	1·04	0·73	0·83
1942 ...	1·47	0·97	0·66	0·80
1943 ...	1·46	0·91	0·67	0·79
1944 ...	1·30	0·89	0·63	0·82
1945 ...	1·25	0·80	0·56	0·79
1946 ...	1·14	0·83	0·53	0·79
1947 ...	1·24	0·72	0·56	0·79
1948 ...	1·04	0·69	0·51	0·76

CAUSES OF DEATH—continued.

Tuberculosis—continued.

Table G shows the number of deaths ascribed to this disease by sexes, during each of the last eleven years. The highest rate for all persons during the period covered by the table was 1.47 per 1,000 in 1942 and the lowest 1.04 in 1948. For males the highest rate 1.53 was in 1942 and the lowest 1.08 in 1948. In the case of females the rate was highest in 1943, viz., 1.44, and lowest in 1948—0.99 per 1,000.

TABLE G.—Mortality from Tuberculosis during each of the years 1938-1948.

YEAR	MALES		FEMALES		TOTAL		Annual Increase or Decrease	
	Number of Deaths	Rate per 1,000 of the Male population	Number of Deaths	Rate per 1,000 of the Female population	Number of Deaths	Rate per 1,000 of the population	Number	Per cent.
1938 ...	1,651	1.10	1,565	1.09	3,216	1.09	— 423	—11.6
1939 ...	1,707	1.14	1,597	1.12	3,304	1.13	+ 88	+ 2.7
1940 ...	1,944	1.28	1,741	1.21	3,685	1.25	+ 381	+11.5
1941 ...	1,855	1.21	1,856	1.27	3,711	1.24	+ 26	+ 0.7
1942 ...	2,297	1.53	2,050	1.40	4,347	1.47	+ 636	+17.1
1943 ...	2,203	1.48	2,103	1.44	4,306	1.46	— 41	— 0.9
1944 ...	1,998	1.34	1,841	1.26	3,839	1.30	— 467	—10.8
1945 ...	1,901	1.28	1,793	1.23	3,694	1.25	— 145	— 3.8
1946 ...	1,753	1.17	1,637	1.12	3,390	1.14	— 304	— 8.2
1947 ...	1,904	1.27	1,796	1.22	3,700	1.24	+ 310	+ 9.1
Average 1938-47	1,921	1.28	1,798	1.24	3,719	1.26	—	—
1948 ...	1,639	1.08	1,464	0.99	3,103	1.04	— 597	— 16.1

There were 2,452 deaths from tuberculosis of the respiratory system recorded in 1948 compared with 2,831 in 1947, a decrease of 379. The figure for 1948 includes 1,281 of males and 1,171 of females—the figure for males shows a decrease of 151 and that for females a decrease of 228 when compared with the corresponding figures for the previous year. During 1948 there were 651 deaths (358 males and 293 females) from tuberculosis other than that of the respiratory system. The respective figures for 1947 were 869 (472 males and 397 females). The figures for 1948 are 218 (a decrease of 114 males and 104 females) less than those for the previous year.

In Abstract IV particulars of the deaths included under the heading of tuberculosis other than respiratory are given. There were 311 deaths (163 males and 148 females) due to tuberculosis of the meninges and central nervous system, 92 deaths (54 males and 38 females) to tuberculosis of the intestines and peritoneum, 66 (39 males and 27 females) to tuberculosis of the vertebral column, 27 (18 males and 9 females) to the disease of other bones and joints, 2 (one male and one female) to tuberculosis of the skin, 5 (2 males and 3 females) of the lymphatic system, 33 (16 males and 17 females) in organs of the genito-urinary system, 4 (4 males) to tuberculosis of other organs, and 111 (61 males and 50 females) caused by disseminated tuberculosis.

In the following table a comparison is made of the number of deaths from tuberculosis of the respiratory system and all other forms of the disease for each of the years 1944 to 1948 inclusive, together with the rate per 1,000 of the population.

CAUSE		YEARS				
		1944	1945	1946	1947	1948
Tuberculosis of the respiratory system	No.	2,935	2,777	2,585	2,831	2,452
	Rate	1.00	0.94	0.87	0.95	0.82
Other forms of tuberculosis.	No.	904	917	805	869	651
	Rate	0.30	0.31	0.27	0.29	0.22

The mortality from tuberculosis at different age-periods for each of the years 1943 to 1948 is shown in Table H. Among persons aged 15 and under 20 years the rates in 1948 and 1947 were respectively 0.97 and 1.27 per 1,000, the figures for males being 0.73 and 0.94 and for females 1.21 and 1.60 per 1,000. In the age-group from 20 to 24 years the rates in 1948 were—for persons 1.73, males 1.50 and females 1.98, and for 1947, respectively, 2.06, 1.56 and 2.58. At the age period 25 and below 35 years the figure for both sexes in 1948 was 1.75 per 1,000, and in 1947 it was 1.99, the corresponding rates for males being 1.69 and 1.96 and for females 1.81 and 2.02 per 1,000.

DIAGRAM No. 3. Mortality from Tuberculosis, 1934 to 1948.

The number of deaths recorded under the heading of tuberculosis for each of the counties and county boroughs, the fourteen principal towns and the total urban and rural areas are published in Tables 9 to 12 and 14. In abstract V information regarding the sex and age at death is given for each county and county borough area.

In the province of Leinster in 1948 the death rate was 1.2, in Munster 1.0, in Connaught 0.9, and in Ulster (part of), 0.9. The corresponding rates for 1947 were, Leinster 1.4, Munster 1.2, Connaught 1.1 and Ulster (part of) 1.0 per 1,000.

DIAGRAM No. 4. Mortality from Influenza, 1934 to 1948.

CAUSES OF DEATH—continued.

Tuberculosis—continued.

The highest mortality rates from tuberculosis in 1948 for county or county borough areas were recorded for the following :—Waterford county borough 1·6, Louth 1·5, and Dublin county borough, Westmeath and Cork county borough each 1·3. The counties having the lowest rates were—Tipperary N.R. and Roscommon each 0·6, Laoighis and Monaghan each 0·7, and Kilkenny, Cork, Waterford, Leitrim and Cavan each 0·8 per 1,000 of the population.

The deaths from tuberculosis in 1948 for the aggregate urban districts numbered 1,290 compared with 1,640 for the previous year. For the rural districts the number in 1948 was 1,813 compared with 2,060 for last year. The rate per 1,000 of the population for the urban areas fell from 1·62 in 1947 to 1·28 in 1948, while that for the rural areas decreased from 1·06 to 0·93 per 1,000.

Influenza.—The number of deaths from this disease in 1948 was 201, compared with 651 for the preceding year and an average of 734 for the decennial period ended with 1947.

The rates per 1,000 of the population for the years 1948 and 1947 were 0·07 and 0·22 respectively.

In the aggregate urban areas the death rate for 1948 was 0·04 per 1,000, and in the rural areas 0·08, compared with 0·11 and 0·28 for 1947.

In the first quarter the mortality was 41 per cent. of the total and in each of the second, third and fourth quarters the proportion was 30, 14 and 15 respectively.

Smallpox.—Since the year 1907 no death from this disease has been recorded.

Measles.—There were 63 deaths registered in 1948 compared with 106 in the year 1947, and an average for the period from 1938 to 1947 of 80 deaths. Of the deaths recorded, 13 were for Dublin county borough, 7 for Galway, 5 for Mayo, and 4 each for Wexford, Kerry, and Donegal.

Acute Poliomyelitis and Polioencephalitis.—The deaths under this heading numbered 18 (8 males and 10 females) compared with 56 (31 males and 25 females) in the previous year. The figure for 1948 includes 4 for Galway, 3 for Louth and 2 for Dublin county borough.

Other Infective or Parasitic Diseases.—There were 43 deaths from Hodgkin's disease recorded during the year 1948.

Cancer.—The deaths due to cancer recorded for 1948 numbered 4,074—2,174 of males and 1,900 of females. The total figure is 112 above the number for 1947 and 152 above the average number for the decennial period ended with 1947. The number of deaths of males is 89 above, and that for females 23 above the corresponding figure for 1947.

The deaths from this disease constitute 11·2 per cent. of the deaths from all causes and are equivalent to a rate of 1·36 per 1,000 of the population. The rates for males and females were respectively 1·43 and 1·28 per 1,000. In Northern Ireland the rates for persons, males and females, were 1·45, 1·42 and 1·49 per 1,000, in England and Wales 1·86, 1·97 and 1·76 and in Scotland the death rates were 1·81 for both sexes, 1·85 for males and 1·78 for females,

In the following table the mortality from cancer per 1,000 of the population in Ireland, Northern Ireland, England and Wales, and Scotland for each of the last ten years is given :—

YEARS		Ireland	Northern Ireland	England and Wales	Scotland

CAUSES OF DEATH--continued.

Cancer—continued.

In Tables 9 and 10 the number of deaths from cancer and the rate per 1,000 of the population for each of the counties and county boroughs are given. Similar information for urban and rural areas is shown in Tables 11, 12 and 14. In Abstract IV the ages at death of the persons whose deaths were due to this disease are given.

In the aggregate urban areas the deaths for 1948 numbered 1,357, equivalent to a rate of 1.3 per 1,000, and in the aggregate rural areas the number was 2,717 and the rate 1.4 per 1,000. In the year 1947 the number of deaths for the urban and rural areas were respectively 1,302 and 2,660, corresponding to a rate of 1.3 and 1.4 per 1,000 of the population.

In Table J the deaths from cancer in 1948 are classified according to the site of the disease and the age at death. The mortality of females under 50 years of age is higher than that of males, but after that age has been reached, the excess in the male mortality is more pronounced. The high female rate in middle life is due to the mortality of women from cancer of the uterus and breast; on the other hand, the excess in the case of males in later life is due to the number of deaths from cancer of the buccal cavity and the digestive system.

Tumours.—In accordance with the International List of causes of death, the particulars of deaths from tumours are shown in Abstract IV in two classes :—(1) those caused by tumours definitely described as non-malignant, and (2) those caused by tumours whose nature was undetermined or was not ascertained. In 1948 the deaths in the first group amounted to 32 (14 males and 18 of females) and those in the second to 134 (76 males and 58 females) compared with a total of 37 and 120 respectively, in the previous year.

The non-malignant tumours included 6 of the ovary, 5 of the kidney, 4 of the brain, 3 of the bladder, and 2 each of the lung, liver and uterus.

The deaths classified under the heading of tumours of undetermined nature included 58 of the brain, 12 of the intestine, 11 of the stomach, 10 of the lung, 5 each of the mediastinum, spine and abdomen and 4 of the breast.

Diabetes.—There were 173 deaths from this disease in 1948 compared with 199 for the previous year. The deaths for 1948 include 87 males and 86 of females, compared with 88 and 111 for 1947.

In the year 1948 the rate per 100,000 of the population represented by the deaths from this disease was 5.8. The rates for Northern Ireland, and Scotland were respectively 7.1 and 9.4.

Other General Diseases.—During 1948 there were 34 deaths classified under this heading, including 22 from coeliac disease and 3 from each of toxæmia and amyloid disease.

Heart Disease.—During 1948 there were 9,564 deaths from diseases of the heart, as compared with 11,118 deaths in the previous year, and an average number of 9,387 for the decennial period ended with 1947.

The deaths from this cause in 1948 represent 26.4 per cent. of the mortality from all causes and are equivalent to a rate of 3.2 per 1,000 of the population.

In Abstract IV particulars of the deaths from different forms of heart disease are shown by sexes and ages at death.

Bronchitis.—During the year 1948 there were 999 deaths in which the cause was stated to be bronchitis. Of the total, 538 were of males and 461 were of females. The total is equal to a rate of 0.33 per 1,000 of the population and constitutes 2.7 per cent. of the total deaths registered. The number of deaths recorded during 1947 was 1,318, and the average figure for the decennial period from 1938 to 1947 was 1,615.

Pneumonia.—The number of deaths recorded from pneumonia (all forms) was 1,239, equivalent to a rate of 0.41 per 1,000 of the population. Of the deaths 689 were of males and 550 of females.

The average number of deaths during the ten years from 1938 to 1947 was 1,871, and during 1947 the number recorded was 1,868.

The deaths in 1948 include 651 from broncho-pneumonia, 172 from lobar pneumonia and 416 from pneumonia (unspecified).

Diarrhoea and Enteritis.—There were 352 deaths of children under 2 years recorded, 202 being of males and 150 of females. The number recorded for 1947 was 744, and the average for the ten years ended 1947 was 870. The urban mortality was equal to a rate of 6.91 per 1,000 births, and the rate for rural areas was 4.39 per 1,000 births registered, compared with respective rates of 16.25 and 7.44 in 1947.

The deaths recorded include 79 for the county borough of Dublin, and 16, 20 and 13 for each of the county boroughs of Cork, Limerick and Waterford, respectively.

* The figures and rates under this heading for the years 1938 and 39 relate only to deaths classified to puerperal sepsis.

CAUSES OF DEATH—continued.

Pregnancy, Childbirth and the Puerperal State.—Deaths under this heading are divided into three groups, viz. (1) deaths from puerperal infection; (2) deaths from other diseases of pregnancy and childbirth, and (3) deaths not classified to pregnancy or childbirth but returned as associated therewith. In 1948 the number in the first group was 18, in the second group the figure was 86, and under the third heading there were 20 deaths; so that the total number of deaths from these causes was 124. The total represents a rate of 1·88 per 1,000 of the total births registered, as compared with 2·15 in the year 1947, and an average of 3·15 for the ten years 1938 to 1947. For the years 1940 to 1946, the deaths from puerperal infection comprise those from post-abortion infection, general or local puerperal infections, puerperal thrombophlebitis, and puerperal embolism and sudden death after delivery.

In Table K full particulars of the deaths by causes and age periods are given, and in Table L a statement of the number of deaths and the rate per 1,000 births for the years 1938 to 1948.

The number of deaths from puerperal infection and other puerperal causes is given (with the rates per 1,000 births represented thereby), by provinces, counties and county boroughs and urban and rural areas in Tables 9 to 12 and 14.

Violence.—The number of deaths classified under this heading in 1948 was 922. This figure shows a decrease of 49 when compared with that for the year 1947. The average figure for the ten years 1938 to 1947 from this group of causes was 948.

Included in the figure for 1948 there were 68 by suicide, 18 by homicide (including infanticide), 6 due to war operations and 830 to other external causes. The latter figure includes accidental deaths and deaths not stated to be due to suicide or homicide. The number of deaths by suicide is 4 less and those by homicide 9 more than the corresponding figure for 1947.

Of the suicidal deaths, 59 were of males and 9 of females. In 11 cases poisoning was the means used to cause death, including carbon monoxide in 2 cases and strychnine in 5 cases. In the other 57 deaths by suicide the means adopted was drowning in 16 instances, hanging or strangulation in 23, cutting or piercing instruments in 10, firearms in 4 instances and in 4 cases other means were used to cause death.

There were 8 deaths by homicide, including 5 of males and 3 of females and there were 10 cases of infanticide.

There were 20 accidental deaths from poisons or poisonous gases, 10 of which were due to carbon monoxide.

Deaths caused by accidental burns numbered 85 (38 males and 47 females), of which 34 were those of children under 5 years of age; the corresponding number of deaths of children in this age-group for the year 1947 was 35.

Deaths classified to accidental drowning numbered 129 (102 of males and 27 of females). The total includes deaths from accidental drowning and also cases in which cause of death was given as "found drowned."

There were 207 deaths included under the heading of transport accidents; of this figure 171 were of males and 36 of females. In 1947 the total under this heading was 179 (142 of males and 37 of females). Deaths from motor vehicles numbered 133, compared with 115 in 1947. There were 62 deaths recorded as due to other road transport accidents. This figure includes 41 caused by bicycles and 21 by horse-drawn vehicles, compared with 27 and 23 respectively, for 1947. There were 9 deaths caused by railway accidents compared with 12 for 1947.

Of the 133 deaths attributed to motor vehicles, 49 were stated to be caused by motor lorries or vans, 68 by motor cars and 8 by buses.

AGES AT DEATH.

The deaths of children under 5 years of age registered during the year 1948 numbered 4,094 compared with 5,743 for the previous year. The figure for 1948 is 11·3 per cent. of the total deaths recorded. The proportion of deaths of males at this age-period exceeds that of females, the rate for males being 11·8 per cent. of the male mortality, and the rate for females 10·6 per cent. of the total number of deaths of females.

The deaths of persons aged 65 years and upwards recorded were 20,437 in number, constituting 56·2 per cent. of the total number of deaths, and include 10,605 deaths of males, or 55·5 per cent. of the total deaths of males, and 9,832 of females, or 57·0 per cent. of all the deaths of females.

Deaths at 70 years of age or over numbered 16,707, or 46·0 per cent. of the total deaths.

There were 138 deaths of persons aged 95 years or upwards (51 being males and 87 females), and of these 17 (6 males and 11 females) were stated to be aged 100 years or over.

The ages of the persons whose deaths were recorded for the year are given in Abstract III by certain age-groups.

AGES AT DEATH—continued.

The following table shows the death rates at different age periods in the years 1947 and 1948.

TABLE M.—DEATH-RATES FOR EACH AGE-PERIOD PER 1,000 OF THE POPULATION AT THE SAME AGE.

AGE-PERIODS	PERSONS			MALES			FEMALES		
	1947	1948	Increase or Decrease in 1948	1947	1948	Increase or Decrease in 1948	1947	1948	Increase or Decrease in 1948
Under 5 years	20·98	14·83	— 6·15	23·48	16·11	— 7·37	18·39	13·50	— 4·89

55— ...	20·31	17·30	— 3·01	22·11	18·56	— 3·55	18·44	15·99	— 2·45
65— ...	51·53	42·60	— 8·93	55·20	45·11	—10·09	47·68	39·97	— 7·71
75 and upwards	147·76	120·38	—27·38	162·19	131·16	—31·03	135·55	111·24	—24·31
All ages	14·83	12·13	— 2·70	15·61	12·61	— 3·00	14·02	11·64	— 2·38

The number of deaths by sexes and ages, and the average annual rates per 1,000 of the population at the same ages, for the period 1864 to 1870, for each of the decennial periods from 1871 to 1940, and for each year from 1938 to 1948 are given in Table 8.

INFANT MORTALITY.

During the year 1948 the deaths of 3,313 infants under one year of age were registered, compared with 4,687 in the preceding year. The figure for 1948 is equivalent to a rate of 50 per 1,000 births as compared with 68 for 1947, and an average of 71 for the ten years 1938 to 1947. The rate for each of the years 1938 to 1948 is given in Table 4, together with comparative figures for earlier periods.

Of the total deaths of infants under one year, 1,843 were those of males and 1,470 of females; the males were equal to a rate of 54 per 1,000 births of males, and the females to a rate of 46 per 1,000 births of females. The corresponding rates for 1947 were 76 and 60 respectively.

The infant mortality during the quarters of 1948 were, respectively, 65, 47, 40 and 50 compared with corresponding figures of 93, 66, 48 and 65 for the previous year.

The infant mortality rate for each of the years 1939 to 1948 is compared with the rate for Northern Ireland, England and Wales and Scotland in the following table :—

YEARS	Ireland	Northern Ireland	England and Wales	Scotland
1939 ...	66	70	50	69
1940 ...	66	86	55	78
1941 ...	74	77	58	83
1942 ...	69	76	49	69
1943 ...	83	78	49	65
1944 ...	79	67	46	65
1945 ...	71	68	46	56
1946 ...	65	54	43	54
1947 ...	68	53	41	56
1948 ...	50	46	34	45

INFANT MORTALITY—continued.

During the year 1948 the following causes accounted for 80 per cent. of the total infant mortality, being equivalent in the aggregate to a rate of 40 per 1,000 births:—premature birth 10·13, congenital debility 7·93, diarrhoea and enteritis 5·01, pneumonia 6·40, congenital malformations 4·90, whooping cough 2·08, convulsions 2·34, bronchitis 1·23.

The deaths of infants during the first month of life were 46·1 per cent. of the total deaths of infants under one year of age. Between one and two months the percentage was 12·0, between 2 and 3 months 9·9, at 3 and under 6 months the rate was 17·4 and from 6 to 12 months old the rate was 14·6.

An analysis of the causes of the deaths of infants under one year of age showing the age at which death occurred is contained in Table N and a comparative statement of the rates represented by the causes of the deaths of infants under one year of age for the years 1938 to 1948 is given in Table O.

In Table 13 the neo-natal mortality (deaths of infants under one month old) is shown for each of the counties and county boroughs during the year 1948.

INFANT MORTALITY—continued.

During the year 1948 the number of deaths of infants under one year of age recorded for the aggregate urban areas was 1,291, representing a rate of 52 per 1,000 births registered. In 1947 the corresponding number of deaths was 2,110, and the rate 80 per 1,000 births.

For the rural areas 2,022 deaths of infants were registered in 1948 compared with 2,577 in the previous year; the rate per 1,000 births for 1948 was 49, and for 1947 was 60.

Table P shows the high rate of infant mortality prevailing in urban areas as compared with rural areas, especially in the fourteen principal towns. For these areas in the aggregate the rate was 50 per 1,000 births, it was 83 for the preceding year. Deaths of infants in other urban areas were equivalent to a rate of 60 per 1,000 births, the rate for 1947 being 70.

In the principal towns deaths from diarrhoea and enteritis of infants under one year of age was equal to a rate of 7 per 1,000 births compared with 5 per 1,000 in the smaller urban areas and 4 per 1,000 in rural areas.

The infant mortality for the principal towns are as follows, ranging in order from the highest to the lowest :—

Sligo 98, Limerick 71, Waterford and Wexford each 63, Dun Laoghaire 60, Kilkenny 54, Dundalk, Drogheda and Bray each 52, Cork 49, Tralee 47, Dublin 46, Galway 45 and Clonmel 30.

The following statements show the infant mortality rate for each of the years 1939 to 1948 for the urban and rural districts in Ireland, and for each of the principal towns :—

YEARS	Ireland	URBAN DISTRICTS			Rural Districts
		Principal Towns	Other Urban Districts	Total	
1939 ...	66	83	85	83	55
1940 ...	66	88	70	85	55

NOTE.—For 1923 and subsequent years the births and deaths on which the above rates are based have been assigned to the normal residence of the mother in the case of births and to that of the deceased in the case of deaths. Prior to 1923 the figures on which the rates were based were partially corrected for deaths in institutions. The rates given relate to the urban and rural areas as existing in the respective years.

PART III.

Abstracts.

ABSTRACT I.—MARRIAGES, BIRTHS AND DEATHS registered during the year 1948, in each Province, County, and County Borough.

APPENDIX I.

ALTERATIONS IN REGISTRARS' DISTRICTS, 1948.

On the 1st February, 1948, the boundary of the Urban District of Killarney was altered to include the townlands of Bunrower, Ross Island, Reen, and parts of the townlands of Ballydowney, Labacane, Gortroe, Derreen and Park, and also part of the townland of Ross Bay.

On 1st March, 1948, the boundary of the Urban District of Clones was altered to include part of the lands of Altartate Glebe, Carn, Clonboy, Largy, Legarhill, Lisseggerton and Teehill.

APPENDIX II.

Table showing the number of searches made, certificates issued, and the total amount received as fees for same at the General Register Office, Dublin, during the 85 years 1864-1948.

1904	5,183	3,958	769 19 7	1947	52,223	46,706	9,875 10 6
1905	5,110	3,954	759 8 5	1948	59,712	51,683	11,052 8 0
1906	5,714	4,409	849 6 0				

N.B.—The above figures do not include a large number of searches made and certificates issued, free of charge, for the use of Government Departments.

APPENDIX III.

CASES OF INFECTIOUS DISEASES.

Summary of Cases of Infectious Diseases notified to the Department of Health during the Year 1948.

This Summary has been prepared from the Department's Weekly Returns but adjustments have been made in respect of any corrections of these returns received after this issue.

The letters in the last column denote the following diseases:—A—Acute Anterior Poliomyelitis. B—Cerebro-spinal Fever. C—Encephalitis Lethargica. D—Diarrhoea and Enteritis. E—Paratyphoid A. F—Paratyphoid B. G—Trachoma. H—Erysipelas. J—Ophthalmia Neonatorum. K—Pemphigus Neonatorum. L—Undulant Fever. M—Continued Fever. N—Dysentery (Bacillary). O—Dysentery (Amoebic). P—Malaria. Q—Membranous Croup. U—Scabies. V—Infective hepatitis. W—Streptococcal sore throat. X—Tinea capitis. Y—Rubella. Z—Anthrax Z (1)—Infective Mononucleosis. Z (2)—Salmonella Infection. Z (3)—Weil's Disease.
