

**Duration of continuous registration
October 2006 to 2009**

Live Register Age by Duration October 2009

	Under 1 year	1 year or more	Total
October 2008	190,396	56,133	246,529
April 2009	313,285	70,828	384,113
October 2009	324,993	87,414	412,407

Short term claimants increase by 70.7% in year to October 2009

There was an increase of 134,597 (+70.7%) in short term claimants on the Live Register in the year to October 2009. This represented 81.1% of the total increase on the Live Register over the year. Of this short term annual increase 8.7% (11,708) occurred between April 2009 and October 2009. *See table 1 and graph opposite.*

The number of long term claimants increased by 31,281 (+55.7%) in the year to October 2009, with 53.0% (16,586) of the increase occurring between April 2009 and October 2009. *See table 1 and graph opposite.*

In the six months to October 2009, the number of short term male claimants increased by 1.1% (2,347), while the comparable increase for females was 8.8% (9,361). *See table 1.*

Other features include:

- ◆ In October 2009 78.8% of all claimants on the Live Register were short term, a decrease from 81.6% in April 2009. *See table 1.*
- ◆ In the six months to October 2009, the number of long term male claimants increased by 12,811 (+25.0%), while the comparable increase for females was 3,775 (+19.2%). *See table 1.*
- ◆ The largest percentage increases in male claimants occurred in the 60-64 year age group, which increased by 13.0% in the six months to October 2009. *See table 2.*
- ◆ Among female claimants the largest percentage increase in the six months to October 2009 occurred in the 20-24 year age group (+14.7%). *See table 2.*
- ◆ For short term claimants, the only age group to show a decrease over the six month period was those aged under 20 years (-10.6%). The largest percentage increase was among the 60-64 year age group (+12.8%). *See table 3a.*
- ◆ All age groups showed increases in long term claimants over the six month period. The largest percentage was among the under 20 years age group (+53.0%), while those in the 45-54 year age group showed the lowest percentage change (+12.0%). *See table 3b.*

The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Jobseekers Benefit or Allowance. Unemployment is measured by the Quarterly National Household Survey and the latest figure for April to June 2009 is 264,600 persons unemployed.

Background Notes

Source and scope of the Live Register

The Live Register is compiled from returns made for each local office directly to the Central Statistics Office by the Department of Social and Family Affairs. It comprises persons under 65 years of age in the following classes:

- All Claimants for Jobseekers Benefit (JB) excluding systematic short-time workers;
- Applicants for Jobseekers Allowance (JA) excluding smallholders/farm assists and other self-employed persons;
- Other registrants including applicants for credited Social Welfare contributions but excluding those directly involved in an industrial dispute.

The monthly Live Register statistics relate to the situation on the last Friday of the month.

Age by Duration Analysis

The current series of half-yearly age by duration analyses of the Live Register was introduced in April 1989. At that time, January and July age analyses which did not cover duration were discontinued and more detailed duration categories were included in the April and October statistics. The age by duration analysis was historically related to the second-last Friday of April and October. The totals in the release are therefore, normally close but not identical to the corresponding end-of-month Live Register totals.

New collection methods, employed by the Department of Social and Family Affairs (DSFA) for the compilation of the Live Register, have permitted the age by duration analysis to match the corresponding end of month Live Register totals from October 2009. This has led to a slight break in series. It should also be noted that there are no age by duration revisions available for periods before October 2009, but the effect of this on data presented is of a low order of magnitude. (See October 2009 Live Register Background Notes for more information).

Tables by more detailed duration and region, as well as time series, can be found in the Labour Market section of the CSO website www.cso.ie.

Descriptive articles

The compilation basis for the Live Register statistics from May 1992 onwards is described in the September 1992 issue of the *Statistical Bulletin*. The March 1980 issue contained a description of the basis used up to April 1992 while a more comprehensive treatment of Live Register statistics appeared in the "Report of the Inter-Departmental Study Group on Unemployment Statistics" (Stationery Office Dublin, Prl. 7925, April 1979). The results of a special study of the differences between the Labour Force Survey (LFS) Estimates of Unemployment and the Live Register are contained in the December 1996 issue of the *Statistical Bulletin*.

Unemployment statistics

Unemployment is measured by the Quarterly National Household Survey (formerly the annual Labour Force Survey). The Live Register is not designed to measure unemployment. It includes part-time workers (those who work up to three days a week), seasonal and casual workers entitled to Jobseekers Benefit or Jobseekers Allowance.

NUTS2 and NUTS3 regions

Regional analysis can now be found in the additional tables on the CSO website www.cso.ie.

The Regional classifications are based on the NUTS (Nomenclature of Territorial Units) classification used by Eurostat. The NUTS3 regions correspond to the eight Regional Authorities established under the Local Government Act, 1991 (Regional Authorities) (Establishment) Order, 1993, which came into operation on 1 January 1994. The NUTS2 regions, which were proposed by Government and agreed by Eurostat in 1999, are groupings of the NUTS3 regions. *See overleaf.*
